Thread: [MOON BOT | THE FASTEST PUMP AND DUMP BOT | HUGE PROFITS 400 % + | LIMITED ACCESS](#)

Zinedine Zidane - February 3, 2021, 3:24 pm

STORY TELLING

As a passionate about trading and coding, I made a decent amount of money with cryptocurrencies trading. Diversifying my investments between classic trading schemas, pump and dump groups, twitter famous accounts (Elon Musk, McAfee ...) pump and dump, exchangers coin listing ... I always do my best to automate all my tasks giving me the ability to be the first on almost all the waves.

With the experience accumulated, I am now able to share with you one of my most successful project for cryptocurrencies.

Old Binance listing bot thread : <https://hackforums.net/showthread.php?tid=5796538>

Old McAfee Coin of the week Bot : <https://hackforums.net/showthread.php?tid=5779258>

FEATURES

Telegram and Discord scraper that gives a full automation to the program to grab the coin posted on groups, you don't need to enter the coin name manually anymore

Buy and Sell at the microsecond scale to be the first on the wave

Stop Loss functionality to avoid losing money when the pump and dump goes wrong

Command-Line Interface for maximum efficiency using the least resources to be the fastest

Free support and setup (can give you advice with trading strategies for pump and dump schema), the bot works 24/7

Custom BTC amount and profit percentage

SCREENSHOTS

If you want more proofs, I can show you a live demo via screen sharing

PRICE

\$50

Paypal, BTC, ETH, LTC ... or any other cryptocurrency

HOW TO BUY

The fastest solution is to message me on Telegram @ZZHF92 (only account, others are scammers, be aware !)

You can also message me on HackForums

Frequently Asked Questions:

Q: Why a come back?

A: Pump and dump is back (XRP, GME ...) and I am able to provide you one of the best solution on the market right now

Q: Why this price?

A: I put myself in your situation, looking for a bot to make some profit on pump and dump schemas and I know how expensive are these programs. I ended with a price of \$50 to give the ability for everyone to join the wave

Q: Why just simply invest manually?

A: By using my bot, the whole trade (Buy and Sell) takes few microseconds to complet, while doing it manually is a pain and waste of time as well as money because you become the one who get dumped by being late on the trade

Q: How much profit can I expect?

A: It depends the pump and dump groups you are following. Generally, the bot is able to make between 50% and 200% on classic schemas

Q: Can I loose money with your bot?

A: If all the parameters are properly set and the pump and dump group is legit you will not loose money. Even if a the group is a scam, the bot has a stop limit fonctionnality that gives you the possibility to set the maximum percentage lose.

Q: Can you help me to install the bot and give me custome advice and trading strategies?

A: Absolutely, when purchasing the bot, you get a full setup + custom advices to make the maximum profits off your trades

Pretty interesting but I think there's a lot of info missing. Do we need to supply our own telegram/discord groups to use with the bot?

What kind of parameters are there? Like do you just set what % profit you want to cash out at (and stop loss). Also do we get access to the full source code?

ingenious - February 3, 2021, 3:49 pm

Is there any trial available?

First of all, thanks for the useful questions

You just need to supply your Telegram and Discord API key to the bot, and it will automatically listen to Telegram/Discord channels looking for a signal to buy by scraping the coin name based on regex

Input parameters :

Binance or Bittrex or whatever exchanges API key
Telegram and/or Discord API key
Amount in BTC you want to trade
Profit percentage
Stop loss percentage

When purchasing the bot you get a full source code access, giving you the ability to edit the bot (if you have some coding skills) and verify that the bot is legit

You loose when you don't know exactly what you are doing (like buying and selling manually ...) and when you follow scamming groups.

Contrariwise, Moon bot will give you all the chances you need to be successful when trading.

Weare2 - February 3, 2021, 7:48 pm

Would you be able to share pump and dump group(s) that you use?

???Berlin??? - February 3, 2021, 8:03 pm

What if they started posting an image of the call rather than posting \$xxx?
You could implement something?

Favorit - February 3, 2021, 8:21 pm

does it have a built in groups to scan 24/7? i dont have to input any channel name myself?

hosmail - February 3, 2021, 11:46 pm

Congrats and GLWS on the bot OP.

The bad thing about pumps and dumps is every group is now turning bad including the biggest P&D group - BPS(Big Pump Signal).

Basically what's happening is the admins pre-pumping the coin and taking all our profits and all of us ending in loses even if we enter into the pumps with bots.

Is there a way your bot detects pre-pumps and buys the coin before or stops us from entering the pump since it's already pre-pumped?

And like Berlin asked above : BPS usually posts images instead of the text to stop bots from entering the pumps. So does the bot have an OCR or smth similar to scrape the name from an image as well.

Regards,
Hosmail

I wrote a private message with a few questions. pm me

Zinedine Zidane - February 4, 2021, 5:22 am

To answer most of the questions asked:

- I can share with you some pump and dumps groups
- The bot monitors groups 24/7 looking for a pump signal
- I can edit the bot to work with some of your groups
- When the bot is configured with your favorite groups, you don't need to input anything anymore, everything is fully automated
- I can implement OCR recognition to get the coin even if they post a picture instead of a text message
- There is a way to detect pre pump and invest at the same time as admin but I will not sell this bot atm or at a high price (\$500)

They are strange things about these customers' screenshots.

Is there really a possibility to manipulate such big markets as ETH and LTC? Also, I don't see any peak to the value where they supposedly sell their crypto for profit. On some screenshot, we are talking about 100% pump on ETH, that's ... big.

Maybe you could explain? I think I'm missing some information, otherwise, I'm truly interested in this product.

500 is absolutely not ironic considering you being no one. You have no name, no proper bot sats and worst of all, you post this sh*t on HF

and its not even a private bot anymore since you've sold it to others.

Your pre pump detect Technology is FREE TO USE. Just take a look at the actual MOON BOT, the one with a website.

So what you really sell, is a strategy/settings for it.

How fast is your bot in terms of seconds/milliseconds? Barely faster than manual buying would still not be enough considering all pump and dump groups are scams so you really need to have an edge if you want to profit.

It depends on your pc configuration and your internet speed.

The fastest I get is less than a second. Customers get in general around 1 and 1.5 seconds

Bot works perfectly. You need a time sync program, and you need to edit 3 Values. That's all that is needed.

He did, since I provide 2 versions, one manual and one fully automated

You mentioned VPN, but we're not gonna do identity theft just to use this. Any other way to legally use this without providing fake documents to binance ?

To give you an idea, I heard Mandala.Exchange + BitMart and maybe a lot more are popping of that support US customers.

In terms of buying crypto as a US person, I'm not sure, I heard your banks are blocking purchases of them. Maybe using bank transfers?

Good luck with finding a way

Towards OP: I'll hit you up on Telegram, really interested.

Next big pumps are 6th of march for Big Pump Signal, and 7th of march for Mega Pump Group. If you want to get the bot for the next pumps drop me a pm

SID - March 15, 2021, 6:52 am

The bot works as it is intended to. OP is very nice and helps in every way possible.

There are 2 types of BOT one is automatic and one is manual, I used the manual bot once as suggested by the OP and it worked smoothly for me. Made me easy 25% in a pump and dump.
(never get greedy)

Thumbs up for the service

Have you heard of the pumpsniper bot? What seperates the moonbot from that bot?

I would say the price, pumpsniper is almost \$500 since Moonbot costs \$50.

OP has stopped replying to my telegram messages after the bot failed to do its job in the last big pump. I hope OP is fine and will come back and fix things.

Hey Sid ! I got some personal problems in my life, I had to leave, but now everything is back at normal and fixed. Message me, the OP is back !

Stanley - April 24, 2021, 11:24 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
