Thread: [PUBG Mobile Metro Royale do you play?](#)

Shrooms - February 5, 2021, 3:15 am

Hey HF just curious if anyone has been playing PUBG Metro Royale on their phones. If you're down to play let me know, I only play metro though no other game modes as they are mostly filled with bots.

I've got some level 4 armour just now, and a refined gun. If you're down to play post here.

Also if anyone has any tips on getting level 6 gear let me know please.

J???? - February 5, 2021, 10:43 pm

I haven't played PUBG Mobile in quite some time. I've debated on getting back into it, but ever since I got my PC I haven't been on my phone for much of jack.

Also, just recently heard of the Metro integration, which I think is pretty sweet.

How is it?

The metro game mode is pretty good. I'm currently making a Minecraft server based around that and Tarkov too, if that interests you fire me a PM

Metro is a really bad feature if you ask me they should have just expanded on maps continued graphix and res. Team PUB knows what they want to put out they just need to stop trying to be so much like any other game and remain OG
