Thread: [Alt season over?](#)

Hitachi - February 5, 2021, 6:20 pm

What do you guys think, are alts going to fade away for a bit or nah?

Mudhoney - February 5, 2021, 6:37 pm

I almost feel the same way.

I think BTC will have another run with alts chilling for the next couple weeks but hopefully after BTC settles its back to alt season ;)

Almonds - February 5, 2021, 6:37 pm

I still think there is a good ride left.

This would be the optimal outcome - would be able to stock up on some more alts for less and chill for a bit before going for another run :P

Just gotta look deep and flip a coin, you'll get that 50% if you're lucky.

?Ñåg?l - February 5, 2021, 7:53 pm

what goes up must come down eventually

I suggest you guys keep money in your banks for the upcoming economic recession otherwise you'll be using the crypto you "invested in" (which at that point could be down by 400%-700% lol) In order to pay your bills.

SIM-82498 - February 5, 2021, 7:55 pm

do u really think alt season is over or was that a clickbait title

Ace Boogie - February 5, 2021, 8:22 pm

I think dominance is still on a downtrend, for a bit longer at least. Probably a short to mid term BTC uptrend (however long that may be) followed by a downtrend for a while longer, to the mid 50's would be nice at the least?

Na, it's only the beginning of alt szn

Don't know about you, but my crypto can only go down 100%.

If you have money in crypto which you might need in the future for paying bills, you're doing something wrong.

You should only invest what you can afford to lose. If you have to sell your crypto you've invested too much.

Totally agree.

Teach the peasant the basics of investing. ??

Over ? Lmao did you ever check lists, its burning

SA777OSHI - February 6, 2021, 8:28 am

I hope not, I was promised at least 20x ? and that hasn't happened yet.

Promised by whom? As you know there are no magicians in life and can't predict the future. Something can always fuck things up and let things go sour.

Not saying alt season is over but it certainly is up in the air at the moment. I was feeling a bit spooked by the gains the past couple days and then Bitcoin's daily close last night sealed it for me. De-risked on some alts that had already ran, you have to think rationally in these markets rather than what you want to happen.

Did I have a target much higher in my head for some of these alts? Yes, but that doesn't matter, all that matters is what's going on and the charts say risk on right now for alts.

Will I regret selling the alts if I'm wrong? No, once you decide to close a position, that's it, wondering what could've been is a tiring and useless process. I was happy with my profits and know that there will be plenty more coins I can make money on.

Short term? idc

Mid-long term we're in a bull run, undeniably.

It will have many cycles, it will have corrections, take profit as you see fit as always.
