Thread: [Any good spoofed servers?](#)

alexorerion - February 5, 2021, 7:11 pm

Hey guys!

I'm looking for a spoofed server vps that is cheap ! for like \$5/Month and that accepts Paypal!
I only need 10mbp/s to Stress Test my web server !

Just for stress testing please.

If anyone knows a cheap VPS that allows spoof can he share the host please?

Thanks ! ?

For Amplification, PPS is important but you still probably won't get anywhere with 10 mbps.

Anyway I sell spoofed servers with 1 GBPS speeds. Feel free to shoot me a message.
