Welcome to ZeroOne's Service Shop

Welcome to my humble service shop.

Starting today, I will be offering a few different services to the members of Hackforums. The services I will be offering within this thread can be utilized in many different ways. Below, you will find the list of services I'm going to be offering as well as a description of each of the services and why you might want to hire me for it.

Before we take a look at the services, I would like to introduce myself to everyone. My name is ZeroOne, I'm a business analyst and a "Microsoft Business Solutions Specialist" from 9 to 5, a gamer from 5 to 9 and I spend the rest of my day on Youtube and trying to knock out. I've been a member of Hackforums since August 2015, but I had been on and off the forums for a very long time. I've recently come back, and I've been enjoying my time here more than anywhere else and therefore, I have decided to provide certain services to the members of Hackforums to make your lives easier and take the boring work off of your hands.

List of Provided Services

1. Proofreading Services
2. Writing & Rewriting Services
3. Video Documentation Services
4. Project Documentation Services

Services (Detailed)

1. Proofreading Services:

If you've ever written an assignment, an article or an ebook for example, you would probably be dreading having to go through what you have written over and over again to make sure that there are no errors in the text whether those errors are grammatical or otherwise. The primary goal of this service is to go through your work for you to mark and correct any errors that I can find within it. This service is mainly aimed at people who write ebooks on various topics on the forums before publishing them.

2. Writing & Rewriting Services:

This service is for the people who have an idea or multiple ideas that they want to write about, share and publish but don't have the time or energy to go through writing out those ideas in detail. We don't all like to write nor do we have the time for it sometimes, but we do have to get it done. Through my few years as a business analyst, I have had to write and rewrite many documents for

various teams within the company I work for as well as third parties to detail the work that must be done.

3. Video Documentation Services:

The title of this service speaks for itself. The objective of this service would be to document any project, moneymaking method or otherwise through a video of the work being done. This service, by default, will be done without having any audio but you will have the option of having me explain whatever you want while I go through it.

4. Project Documentation Services:

This service is mainly dedicated for the coders and programmers out there but I am offering it to anyone that has a project they would like to document. We all know that after finishing a project whether that project is personal or professional, documenting it would be the optimal way to never lose track of the progress we have made so far but let us be real, everyone tells themselves they'll remember everything about the project until one day they have to edit something (this has happened to me multiple times before).

I would like to highlight that the prices of the services as well as the time that will be taken to complete any of them has not been mentioned anywhere on the thread as both things are going to vary depending on the amount of work that has to be done.

Finally, payment for all of these services will be done in advance unless you fall under a specific criterion of members that I am choosing not to disclose in this thread.

I am currently offering two "vouch" copies of any of the provided services to two different members that will be chosen at my discretion.

T.O.S ([Click to View](#))1. Any of the policies listed here can be changed at my own discretion.

2. Any payment chargebacks will result in a dispute and no further services will ever be provided to you.

3. If I don't deliver any of the services on time, you will have the work done for free. If you had paid in advance, a full refund will be issued.

Vouches

Hi [flyingduck](#) , thank you for the input and the help you provided in private. I will be adding my rates in the near future.

Hi [Parks](#) , I don't do do copywriting as I'm not that experienced in the field but I am willing to check what kind of job you might have for me and if you like the work I deliver, we can discuss payment terms. If you don't like the work, however, I would love the feedback on it.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Always a pleasure working with [ZeroOne](#) despite an unfortunate setback he was still able to provide work on time, and of good quality.

This vouch won me an emerald egg, extra nice.
