Thread: [What Handles Can You Grab iP's From? / Need Someone To Grab Someones Ip, 6 Handles](#)

Blanc - February 6, 2021, 6:07 pm

I have this one guy who scammed me and made jokes about my father dying of cancer, so I need some help grabbing his Ip either you do it or you help me figure out how to do it. I have the guys Discord, Spotify, Twitch, Youtube, Steam, Xbox Account. ?

Also is there any way I could get into his Webcam.

While Im editting this thread, Im wondering how is it possible to get your neighbours wifi password?

Noodlez_ - February 6, 2021, 8:11 pm

Yeah, boot him offline and watch him touch his weenier. That'll show him.

There are plenty of tutorials on this site on cracking wifi passwords.

Just send him a grabify link.

when you say you have his accounts im guessing not their passwords or i would suggest password re use with a mask on it during a bruteforce?

as for the guy who wants to watch him touch his weiner as he gets booted i ask how? his packets

wont make it to you so you can watch him? whole point of ddos is to deny internet so i cant watch him touch his pp ???

as for the grabify link ewwww it almost never works but is a possible solution make sure to put a link shortener on it for obfuscation?
