Thread: [Whats your current investment portfolio?](#)

Peppermint Butler - February 7, 2021, 12:55 pm

What's your current investment portfolio that includes crypto?

I don't have that much money invested at all but this is my portfolio:

ETF: Motley Fool 100 Index ETF (10 shares of TMFC)

Stock: Apple (6 shares)

Crypto: BTC (.0498 coins), ETH (1.05 coins).

Currently up \$700+

I sold all my Fiverr stock when I invested at \$20, so I got into crypto.

UPDATE: I just cashed out my 12.15k DOGE when it hit .08, I bought around .023.

I'm mainly invested in BTC, ETH, XMR, and ADA. I have a couple other smaller projects that I dabble in.

Hitachi - February 7, 2021, 1:20 pm

Currently ETH, ADA, GRT, LINK. There are some more projects I'd wanna research and invest in but it's starting to take too much time so I'm trying to keep it to max 4-5.

Hi! I'm going to be doing research these next few days on crypto. I tend to gravitate towards stability and validated business models.

UPDATE: just sold my DOGE, cashed out. Updated thread with how much I made haha it was a good day.
