Our Valorant Cheat has many features which allow you to ruin the game and defeat your enemies easily.

This Hack can be used in all Valorant servers such as Unrated, Competitive, Spike rush, Deathmatch & Custom games.

Our TriggerBot allows you to shoot & target the competitor first, which gives you a huge advantage in winning the game.

On key is a feature available on the TriggerBot. After selecting your key, All you need to do is holding your selected key and wait for the enemy to cross to kill him.

Also, This TriggerBot fits with all enemy highlight colors (Red, Purple & Yellow).

Use BunnyHopping feature to escape & dodge enemy bullets, Auto-Pistols & Auto-Shoot can be used at the same time.

We also have Save / Load settings buttons (Save button - to save your configurations / Load button - to load your saved settings)
