Thread: [Windows Defender Disabler + Downloader FuD\(RT/ST\)](#)

HackOS - February 8, 2021, 10:50 pm

Windows Defender Disabler + Downloader FuD(RT/ST)

This disabler removes defender definitions , disables WD itself and also locks it so that the victim cant enable it again, Then if the disable is successful it will download and run your stub, It will be left disabled even after reboot.

Terms & Conditions

I wont be responsible for any actions you do with this exploit

I will give you a live demo if you contact me

I will give you Support if you have any issues with the product

Show me proof of detection for claiming ReFuD

No TRIALS

No REFUNDS

Contact me on discord for any queries: HackOS#9518

Pricing

\$35 Disabler

\$40 Disabler + Downloader

\$70 Disabler + Downloader + 2 ReFuD(Only 1 after 10 days from purchase)

[contract=tid]Start Contract[/contract]

Stanley - February 8, 2021, 10:59 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

caerus - February 9, 2021, 2:37 am

OK..I took the plunge for you punks and went first on this. Paid the \$40 for a build 'AFTER' seeing a full demo on his machine. The tool works as advertised.

Be AWARE: -it will not be totally FUD..to gain admin he uses a technique which elevates to ADMIN but is caught by a few AV's (Detected by 5/26 on antiscan.me----> KAV- McAfee- ESET + 2 minor) but this acceptable considering what it does..(crypt it further to protect your investment) ..which is full and complete full kill of Windows Defender/Smartscan including the anti-tamper shit...after which you have full reign over host machine which is ideal for ratting enthusiasts.

I can say by my years of experience, this is NOT a public exploit but one the coder (partially) revealed to me his own path to a custom method which is not floating around on github or similar places.

The coder is knowledgeable, friendly and helpful across desktop-share and willing to implement custom features which I have discussed with him for my own situation (an error pop window to throw

the end-user into confusion..).

Given years of buying sh*t tools on HF .. I can say with confidence your are dealing with a legit seller in this situation.

I will buy again from him with confidence (actually already have done so and just waiting btc confirmations...) to fine tune my package.

Sorta hate to invite others who might impact my own fud, but this is good to go..so ENjoY!

Thank You for the honest review

g3ntl3m4n - February 9, 2021, 3:06 am

If you need a review and give out vouches let me know..

What you guys did right now is not allowed (vouching without contract)

Good luck with sales!

HackOS - February 9, 2021, 3:07 am

<https://hackforums.net/contracts.php?action=view&cid=258865>

It's private but they didn't link/add the thread in the info so the "Contracted Customer" is not visible.

Also, they did selling contract. Not a vouch copy contract.

HackOS - February 9, 2021, 11:29 pm

Hey Guys now that I verified my discord contact me there at HackOS#9518

SIM-4884612 - February 11, 2021, 5:03 pm

Code skidded from other projects.

Edits registry keys, easily done.

Very obvious once disabled, doesn't even try to hide it.

Used Nyan-X-Cat's UAC bypass (Literally has Nyan Cat flash up on screen)

Only FuD against Windows Defender.

Unsure about downloader but it's very annoying to setup on windows machines.

Not worth the money in my opinion, just make one yourself or find a GitHub repository, just like the OP did.

Melted - March 19, 2021, 10:28 am

Great concept. If this was confirmed to be always 100% FUD, with constant reFUDS, I would purchase this. You have to understand that the stub would need to be FUD, or it defeats the purpose of the WD disabler.

For anyone wondering if this person is trusted or worth the money. No. No he is not, feel free to look at how he behaves when criticised -_-

I have only ever had bad experiences with this child and will never recommend him due to his lack of knowledge and complete disrespect to everyone, not a chill vibe.

Oh and there's also the part where he has attempted to scam people in past and his "FuD Dropper" Was nothing more than a poorly made skidded tool that he used as an exit scam.

Yeah, my thoughts exactly, I thought people deserve to know who they are dealing with. He is a young child and his first product (which he used as an exit scam when he realized he couldn't make it work) was using code from Nyan Cat and other developers, completely Skidded.

The fact this kid made it to top seller is the reason I'm not gonna sell any of my stuff on here. Too many kids and people like BitRAT n Snyke run a monopoly here with their shitty products, trying to crack competition.
