Thread: [BTC Live Sportsbetting recommendations](#)

Cameron - February 9, 2021, 1:32 pm

Hey guys,

Looking for a reliable BTC sports betting site as I've had my account closed on a few normal betting sites.

Essential looking for sites that that will allow live betting, large deposits and withdrawals without long holds ect.

Is cloudbet still the way to go?

Thank you

Hey mate,

This is a review of my #1 crypto casino:

<https://cryptovegas.xyz/casino/stake/>

Instant withdrawals, no KYC, many coins available and great Promos.

Check out the exclusive bonus section out and get 7\$ for free :)

If you have any questions, let me know :blackhat:

Live betting allowed? What sports are supported for this?

Max bet/wins? To be honest I'd be leaning towards larger more established companies as these will be large bets but could be interested in trying your site out with smaller bets

This is one of the most trusted crypto casinos in the industry and you won't have any problems. A few millions are wagered and paid out daily.

There is any sport you want available. And I think the max bet on sport bets is 5 BTC and on

provably games even more.

Do you offer live betting? That's the most important factor for me

Sportsbet.io is the best in my opinion

Thanks bud. Do you have experience with them in large volume withdrawals? I know some in the past would make people wait for days and whatnot whereas I'd want to cash out from the site as soon as the bet was over/paid out.

Small bets most are fine with this but these will be big bets

Be very careful with sportbet.io, they have lots of unsolved scam reports like

I second this, never had an issue with them. My deposits are quicker there (crypto) than on BetUS.

Sportsbet.io is the best indeed for live betting and betting in general.

What do you all think about stake? Looks similar to Sportsbet.io any better rewards?

The rewards on Sportsbet are a joke. You bet thousands and get like .09 mBTC

You can read a review about stake here: <https://cryptovegas.xyz/casino/stake/>

You get weekly and monthly bonus depending on your wager. You get a rakeback depending on your wager only from casino games.

Also they have a VIP level system which increases your bonuses and gift you more rewards. I reached Silver for example and got 50\$ in BTC just for reaching it.

Often they have big promotions like a lottery last year. You got 1 ticket for every 1k you wagered. The prize pool was 100× 1000\$ in BTC and 1× Lamborghini which was more than \$200k worth. And many other promotions.

It's my favourite casino and I've wagered a few hundred thousand dollar there.

Thank you for that. I will take a look once I get home.

Sportsbet.io resets their trash awards every month. Not that hard to climb that ladder but the rewards are just awful.

Thanks again
