Thread: [\[Whitehat\] HOW TO BUY & RESELL 3080, 3070 GPU and PS5 FOR A PROFIT \[\\$20,000 IN SALES\]](#)

AS OF MAY: IT IS EXTREMELY HARD TO GET GPU MANUALLY(WITHOUT A BOT)

Use the below button to initiate a contract, to purchase this product.

[contract=tid]Start Contract[/contract]

Hey guys!

Over the past 3 months I've been buying and selling sold out:

RTX 3080, 3070, 3060 GPUs

Ryzen 5950x, 5900x CPUs

Xbox Series X + Playstation 5 Disc & Digital

I currently have over \$20,000 worth of sales across multiple marketplace platforms. Thousands of dollars of profit every month, and countless shipments going in and out at any given time. At this point it's basically on full autopilot, and I can teach you how. There is no reason to ever pay scalped prices for 3080s and PS5s.

What is this?

What this is, is a completely Whitehat (Absolutely NO SE, refunding, carding, etc) step by step guide of how I research, obtain, and sell products that are continuously out of stock. You can simply keep your brand new 3080, PS5, or 5950x... or build a business from it. I try my best to teach you everything I've been doing the past few months, and to give you the tools and tricks to obtain 3080, PS5s and make profits regularly. There is both manual and autopilot information in this guide. Though, there is nothing proprietary about what's in this guide, this is simply the way I make money, which you can do too.

What this ISN'T is a magic trick to buy a 3080 or PS5 if there aren't any available. These products sell out in a matter of seconds, this guide is designed to simply teach you how to make the most of those seconds, and to capitalize on profit margins if you decide to resell it.

What kinds of profits are expected?

You can expect to make AT LEAST \$100, upwards of \$500, with each successful order. Pricing depending on market value, but \$100 at the very least, immediately making your money back.

Please PM or Convo me with any concerns and I'll be more than willing to answer them. Thanks.

Price: \$25

Payment Methods: BTC & Others

You can tell right away that this has some serious potential. OP has put in ALL of his knowledge on this topic, every step is there, every resource you would ever need is all explained. I would recommend this to someone who would like to earn anywhere from \$400+ a week! This method will provide you with excellent profits if you put the time in. The profits are there, the resources are there, for the low price of \$50 I would 100% vouch for this method over and over again! Thanks for this opportunity OP! GLWS :)

(Feb 14, 2021 11:52 AM)Fish Wrote: [\[CITE\]](#) Hey everyone, I was able to get a copy of this method and here is my honest review.

To start off, everything that you need is included. Yes, the items are OOS everywhere (thats why you're reading this thread) so this is not some crazy method that makes them go back in stock, instantly. The method was well explained and easy to follow. Like everything, you will need to be patient and wait a bit before you can place your order. I have high hopes that I will be able to get an order in within the next few days. Once the order is in, you can pretty much instantly sell it to make some nice profit for doing hardly any work. Again, if you want to have higher chances at obtaining one of the cards/systems, this is what you need.

Thanks for sending me a copy of the method OP, GLWS!

This is more of a guide not a method, but although that is touched on in the guide there is no need to buy any type of auto-purchaser bot.

I see. I have been in the sneaker resale business for a bit, so not sure if I will learn anything/increase my chances with this guide.

How much would be needed to get started in this kind of business? IDK if it's worth paying the \$50 to learn something I can't do if I need to put \$1,500 down :p

You need to be able to afford whichever product you want to obtain.

The cheapest that's included in this guide I believe is the PS5 Digital which costs \$400, and currently sells for \$800+.

Why do I feel like this is just going to tell buyers to pay to join a cook group, setup autofill/buy a bot and wait for a restock? All cook groups have monitors on restocks, especially GPUs and PS5s...

If you have any questions, feel free to PM me.

Not sure what a cook group is, but this is a 10-15 page guide and there's no purchase of a bot necessary. Obviously part of it is waiting for a restock, there's no magic trick. It's just a guide of how I've made money, and for people if they are interested. Thanks.

I'm aware there's no magic. I run tasks on restocks myself and the chances of getting it manually are very, very slim. Not sure why you're selling public knowledge but GLWS I guess.

It's an all-inclusive guide, it does have details of discord related monitors though really it's a top to bottom guide that goes beyond simply having alerts. Though it's meant for beginners so if you're already able to buy them you probably won't need this guide.

Thanks.

That's just the amount I've made since starting, nobody would lose out on profits even if 100 people started doing this. I would charge more, but I feel products are already expensive as it is and \$25 is a good price for just learning how to do something.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

The products in this guide all sell out immediately, and people are buying them at high prices to get them. This is meant to help you secure a PS5, etc and resell it if you so wanted.

Cheers.
