Thread: [HTTPS BOTNET](#)

person666 - February 11, 2021, 9:42 am

Hello Everyone,

I wish you good !

I am writing to you because i am looking for a good open source https botnet.

I found the next one :

--> <https://github.com/hashXploiter/darkcoders-net> My Second Choice

--> <https://github.com/UBoat-Botnet/UBoat> My First Choice

--> <https://github.com/Raffy27/OrionPanel> (looks to dont be a https botnet)

I want to hos it under crazy rdp (the host offer from1\$/Month)

Have you some informations or advice or tips to share with me in order to do want i want please ?

Best regards,

Y viva el mundo libre

Stetsed - February 11, 2021, 9:44 am

I would suggest using DarkNet, has alot of features. The latest version 3.7 was removed from the github but people have posted it on this forums

privacyPiracy - February 11, 2021, 9:52 am

How much are you looking in the range of slaves? 1\$ hosting no matter from who sounds a bit too little to manage resources of multiple connections.

person666 - February 11, 2021, 9:54 am

Between 5 - 10 in case but go to growth after because gone make some try :)

SuperiorUser - February 11, 2021, 9:57 am

lol. good luck. this is just stupidity beyond me.

person666 - February 11, 2021, 10:00 am

Explain superior uSER please :)

FUDcrypter - February 11, 2021, 10:01 am

I have a FUD crypter. You want ?

Bypasses all antivirus !

0 detctions !

Crypts all payloads and ransomwares and botnets !

SuperiorUser - February 11, 2021, 10:02 am

(Feb 11, 2021 11:00 AM)person666 Wrote: [\[CITE\]](#) Explain superior uSER please :)

you're committing a crime, using a public source, and using a 1 dollar host. let me know how it goes :)

yes. it is a crime. you just said you wanted to infect 500 machines. call me crazy but I don't believe

you legally have access to 500 machines.

person666 - February 11, 2021, 10:12 am

Without problem will send you a message from jail :p lol

Anyway this project is for my school and not for illegal purpose ;)

- 1- Open source mean well know by AV company , but you can try use BlackNet..
- 2- crazy Rdp :) you need host on server Http , is not Rat . you need decent VPS + domain

loadman - February 11, 2021, 10:45 am

the thing with open source botnets is that they are easy to exploit + outdated
<https://www.malvuln.com/> <--- this is a small example

moving on

here is my advice to you

you should just make your own botnet as this will help u to avoid detection and also fulfill ur requirements. you can use open source projects as references Or hire an experienced developer to make you one if u dont have time but alot of money

(Feb 11, 2021 10:54 AM)person666 Wrote: [\[CITE\]](#) Between 50 - 500 in 1case but go to growth after :)

Ok thx no problem for av it's for school project dont want to spread it :)

Regarding the host can i host it under a ftp on crazy rdp ? I dont understand ? i dont need a vps at least ? I want to take blacknet for that test at least : <https://github.com/oraclethunder/BlackNET>

Works good if i choose just an on host ? What you think about ? :)

DreamBots - February 11, 2021, 12:07 pm

Ok thx ! :) When you say easy to exploit mean with honeypot for example ? Made a reverse ?

As i told it's more for school project so dont care about the outdated, want just it working :)

What you think about : <https://github.com/ingramali/BlackNET-2>

(Feb 11, 2021 01:07 PM)DreamBots Wrote: [\[CITE\]](#) Moron ? Lol why ? i means such 1\$ hosting as 1-2days life with Open source botnet

Ah yeah it's not in there rull, know a good host please ? With a good quality price ?

Buy VPS hosting not web hosting

person666 - February 11, 2021, 2:03 pm

(Feb 11, 2021 02:33 PM)Doomslayer Wrote: [\[CITE\]](#) Buy VPS hosting not web hosting
You know a good and faster one please ?

Stetsed - February 11, 2021, 11:43 pm

(Feb 11, 2021 03:03 PM)person666 Wrote: [\[CITE\]](#) You know a good and faster one please ? CrazyRDP is good, they allow everything expect the really bad shit but they allow botnets, is 10 bucks a month for VPS hosting

3xploit - February 13, 2021, 9:24 am

There's no good free, open-source botnet unless you modify/change it yourself. If you want to build something profitable you have to invest some money or effort into it.

I would go with darknet I dont know if the latest version is on github but you can ask around and I am sure people will give you it.

Pretty much this. The most open-source bots are outdated, not working properly anymore and can't keep up with modern security measures.

Also dont think that cheap hosting would even be able to hold 500 connections.
