Thread: [What would you charge? - Webshop & Service!](#)

LoremIpsum - February 11, 2021, 2:59 pm

Hello there!

I got asked by an old investor of a partner and me, to create a webshop for him.

The webshop is related to gardening sales and/or service. Keep that in mind.

I am posting this to see how HF members are thinking about the market for webshops and all, but I have made a few for clients in the past and I charged amounts which I will not include in this thread to keep it unbiased for those who advice me.

What do I know;

- < A webshop, including hosting and domain is required
- < Products and/or services will be discussed in tops 2 weeks
- < Content and images will be provided by me
- < The webshop will cost me at least 10 hours to build

What do I want to know?

- < What would you charge for this project, with the little information I have right now?
- < Would you charge everything upfront, 50% or less?
- < Any other things you would include (for free or charge extra for) to this webshop idea?

Before posting;

- < Please read the whole thread, I'm not replying to trolling posts
- < I will have an open and clear conversation with my client in the short future
- < I am asking HF members to see how you think about it, the final decision is between my partner and me

Thank you all for reading and a big thanks for those who give advice!
