Part 3:

A long time ago I decided to share my TA on GOLD with the HackForums community. I'm pleased to say that our pyramid has been formed perfectly. We are now at the top. I'm cashing out of gold. Not just gold though, general market forecast globally is bearish, with most major market index being at a trend resistance simultaneously, this is no coincidence. All have over bought RSIs and overbought MACDs. VIX will run, making it a great time to buy options and make some well placed shorts. Take notes on what happened Feb 2020, markets globally tanked over 30%. 1 week from today and it will have been exactly 1 year.
