Thread: [Gwent: The Witcher Card Game | SOURCE CODE](#)

BooGod - February 11, 2021, 9:42 pm

Is this game source code holds any value to anyone?

I mean...I have it, but in HF isn't allowed to sell leaks right? So, would it have some value on the internet?

It was leaked publicly on the internet today. Within a week you'll be able to find it on any torrent site for free.

Torrents don't care about DMCA shutdowns. If piratebay and other torrenting websites cared about DMCA requests, those websites wouldn't exist.

I'd say any type of source code that is made up by some HQ code is relevant to someone.

Thanks, I will look around to see if I find someone interested.
