TekkenXD v1.3 Features

[Fightstick]

- Documentation on how to use your fightstick with the cheat

[Universal]

- Korean Back Dash hotkey and speed : Set a key to KBD and change how fast you want it
- Customizable Block Hotkey : Set max distance, % chance of blocking. Set Low, Mid or High
- Low Parry On Demand Hotkey : A hotkey that will block everything and low parry lows instead
- Tech Throws and Command Throws : Customizable key to tech them

[Auto Punish]

- Please check which characters have auto punish feature. Can request a character not implemented before buying :)
- Most auto punishes will avoid punishing moves with pushback and other moves that may cause you to whiff. This feature is not perfect and is an ongoing WIP
- Auto Punish works into all chars except: Lucky Chloe, Shaheen, Lei, Eliza, Xiaoyu, Eddy, Anna, Katarina

[Yoshimitsu]

- Auto Flash/Kincho Parry : Neutral blocks and blocks low, then flashes/parry all strings and moves applicable. Use hotkey at short range
They will be updated in the near future.
- Auto Punish - Punish negative frame moves when applicable, can set to auto or hotkey
- CH KIN f1 followup : Automatically does a followup move
- Supreme Soulstealer Key : Holding the key in neutral, make sure you are in range while holding it, will activate if you are in rage and an enemy presses a button.

[Bryan]

- Auto Punish - Punish negative frame moves when applicable, can set to auto or hotkey

[Devil Jin]

- Auto Punish - Punish negative frame moves when applicable, can set to auto or hotkey

*More characters will be added over time through updates or suggestions. If a character you want to use is not listed, you may request the character to be added on discord before you buy

[Suggestions]

- Please let me know all bugs you encounter, they will get fixed on the next update
- Any specific features for the cheat or a character will be noted and could make it to the next update
