I wouldn't mind taking a vouch copy and coming back to leave my results as a review if you'd like. Let me know, I can make the vouch copy contract if you'd like.

Can confirm OP's services work as stated.

Was very straight forward and easy to see how they work and how to order a service.

The first service I tried to test never ended up going through because it was so busy and I got the funds back for that.

Second test went through within minutes and had IG followers flying in out the wazoo. Great for the price.

Definitely a legitimate service!

I have an obvious and serious conflict of interest here on multiple levels. Made obvious if you view our individual sites. We need to talk OP

To avoid brand confusion as I had my panel up here months before you; I've compromised and changed my theme. You should have looked around before launching as your site was an identical match to mines minus a few assets and text edits.

Doesn't the Dripfeed panel and Instant panel have the same template? I think what matters is the service, price & delivery, don't worry I won't comment on your thread... ?
