Errr I don't have an answer for that, but I'm interested what type of gains you can get from \$22.

Good luck sending \$22 and having anything left after fees

I don't know, that's why I'm asking

I don't believe you have a viable solution between the low amount of BTC against current fees. \$22 even with 6% interest would only be \$1.30 worth of interest after a year. You'll probably pay more than that in fees by sending it to a DeFi.
