Thread: [Rank On Page 1 Google - Backlink Service](#)

Dr.Hurlu - February 13, 2021, 3:21 am

If you have a website/blog or whatever page and you wish to rank it on google you need to have a good quality backlink profile.

A backlink is simply a link BACK to your website from another website (that you don't own).

If you get many backlinks from poor quality websites google will notice and even penalize your website making your chances of ranking even lower.

This is why I provide only HQ backlinks from well respected high authority websites with high DA(Domain Authority) 90+ ratings and high PR 7+ (Page rankings).

This way you can make sure that the links you get from this service will help you get more juice in the eyes of Google and rank higher up!

Backlinks usually tend to index in 20-30 days which is when you should see significant improvement in your rankings (this also depends on the age and quality of your domain).

At the end you get a full detailed report with all the backlinks, all will be made manually and will be 100% google and Matt Cutts animal safe.

My discord: Puliver#6557 or PM me here if you're interested.

I will do 80 manual HQ backlinks all from only high authority well-ranking websites, no automated software used, delivery will take 4 days, price is 30\$ on pp fixed.

it's not a problem but the backlinks will be in .edu, .com websites not .it, it will still help you rank since the keywords and description will be in Italian and all of these websites are high authority and some have vast content in different languages
