I think KYC is required for deposits, not for withdrawals. You get id immediately after registration.

I am not 100% sure, so correct me if am wrong.

KYC on binance is not required for deposits nor withdrawals when it comes to crypto. But when you decide to deposit or withdraw using a bank it forces you to submit a KYC.

Though the question is to receive the airdrops you mentioned do I have to have a verified Binance account?

EDIT: Just checked their FAQ in order to receive the drops we have to submit KYC documents to binance. Probably it's about time for me to verify my Binance.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
