I'm looking to purchase one gmail account which is phone verified and private. Do I get access to the phone or google voice or something?

They come in Code FirstName,LastName,DOB,Gender,Country,Login,Pass,Phone # format. Continued access to the phone used to register is not included. Just the account ready for your personal and private use/reasons that have extra validity due to having numbers verified on them.

Make a contract or hit me up to buy :)

Gotchu. But how about OTPs? I mean, how am I even supposed to pass through OTP if I don't have phone access?

Or I'm missing something here?

For custom orders, we can set any recovery emails you may want to the account during creation as well as remove the phone number after verification and creation. Otherwise, they come as-is. Never had someone actually comment on having an OTP issue arise.

But again, if you needed bulk custom, we could set things even more to your specifications and requirements. Even specific countries. We can talk in private about this if you like.

so you will make recovery e-mail for each of those accounts too? that;s really unimaginable..and pretty sure due to region change it asks for OTP or other verification during login,

Custom recovery emails are possible. Also is the removal of the number completely after using it to create the account.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
