Thread: [Got 1000\\$ to invest suggest me](#)

reaand - February 17, 2021, 2:14 am

Hi i got 1000\$ to invest in crypto can you suggest me what to do? mid/long term and can be all on btc too if you suggest that.

Thanks!

Don't ask for suggestions, who are you gonna blame if you lose your money?

Do some research, and then you can maybe discuss about some coins. This isn't the way if you would ask me.

In the end, it's most likely BTC/ETH who will survive. Others are mainly hype coins, for this moment. Not worth holding long term.

Misery - February 17, 2021, 4:43 am

I would really suggest doing your own research. There's many good coins to invest in, some with higher predicted returns than others. Of course that comes with a risk as well.

I personally wouldn't throw all my eggs into one basket, I'd rather invest in multiple coins. You could also invest the \$1000 over a timespan of a few weeks or months.

if You invest into ETH/BTC to make short term profits or not hold longer then few Years, You are playing it wrong. Do the research on altcoins that are lagging at the moment, invest, wait couple of months and profit 3x-5x-10x :)

ETH has risen 1833% since 2020 crash, if it goes to 3000% that would be insane, and what will You earn ? less then 50%...

BTC has risen 1100% since 2020, if it goes 2200% its gonna hit around 90k\$, and You will almost double Your investment if You buy now.

Do the mats, research the altcoin market and find the laggards :)

Would recommend you to invest on waves , and this would hit 20-25\$ before Q2

I do not think you can say that.

It is okay to hold ETH/BTC for a shorter term and scalp from the big volatility right now.

Honestly I think it is not so smart to buy in for the long term in the current market, but instead wait for a dip.

Its hard to answer that, i did a similar question here some days ago and received all kinds of reply's , BTC and ETH seem to be always the most secure investments, but there's a bunch of others alt coins and tokens that can gives us very good profits in a short/long period, you need to do your own research, its hard, i know, im on the same boat.

Stellen Sie TT - February 17, 2021, 6:35 am

BTC OR DOGE

Bestway to invest rn

P1R4T3 - February 17, 2021, 7:36 am

BTC, ETH, BNB, and maybe NANO

I would go for those

jzander - February 17, 2021, 8:47 am

Don't use Stellen Sie TT. He took my money. Scammed me.

Thanks to all, i'm asking suggest because i'm not good in finding some good coins i mean i'm a bit new in this but i'm listening all.

xVulnerable - February 17, 2021, 10:05 am

Always bitcoin if longterm. On the other hand I just put \$1k on ZEN and made a few bucks for now.

Omniscient - February 17, 2021, 11:38 am

Maybe something like Waves with staking. Where you can earn more of the crypto and compound your holdings.

null1fy - February 17, 2021, 2:42 pm

If you want to split the investment i would give you this advice and you can do the research . Right now during the bullring yea if you can count on the short term flip make a few bucks on btc maybe if you tim it right but if you wanna make real money invest in cardano ADA. And invest in Chainlink LINK. once the publics rush to learning what crypto currencies do btc is only hot because its a brand name people know or have heard or seen but when the money starts to build on things that actually have a purpose you will be happy you read this and listened to my advice and maybe you can share some insider stuff on here with me lol!

Nice to see a follow reef supporter.

@OP I made %300 last week with PhoenixDAO its still rank #990 a little high risk but im going for a 10x you can hop on if you want a risky ride to the moon.

Also Reef has tested quite under support level yesterday got corrected quite good, i'm expecting a small moon their leader got big partnership scheduled this week

Buy reef around 0.037 / 0.041. it had tested 0.05 all week just got corrected.

High risk : Umbrella Network, PhoenixDAO, GLTCH

Mid-risk : Polygon, Reef

Safe bets : XMR, Waves, Polkadot.(most of top 20)
