Thread: [CURRENTLY ON SALE!!! BEST BUSTABIT SCRIPT ON THE MARKET. \\$200 A DAY GUARANTEED!](#)

TheRealChef - February 18, 2021, 10:16 am

HUGE DISCOUNT! CURRENTLY ON SALE!

Hello everyone, I'm here today to sell my Bustabit script which I have been using for the last 2-3 months to generate steady profits.

If you know anything about gambling and investing, then you know that proper RISK MANAGEMENT is KEY to success.

My script utilizes a proper risk management principle that helps you generate steady profit.

This script is not something that you run all day long expecting immense profits—if you leave any script on 24/7 you are guaranteed to lose money.

My script and guide tell you how to "beat" bustabit and profit instead of recklessly gambling your money.

Vouch copies available to ranked members (3/2).

NO MORE VOUCH COPIES BEING GIVEN. Waiting on users to test and leave reviews.

I'm offering a price reduction on my script. I hope it will keep you guys in business with me with my later programs.

First 5 copies - \$75 each

Next 10 copies - \$150 each

Next 15 copies - \$250 each

Next 10 copies - \$350 each

Last 10 copies - \$450 each

ONLY 50 COPIES EVER BEING SOLD.
Middleman accepted.

Sounds like a good product.
LMK if there are any vouches left.
Will be willing to try it out with a good balance account.

Nevertheless GLWS OP.

Not available anymore, sorry.

Waiting for reviews. I bought scripts like these before and ended up broke. So yeah, I might need to see more details first.

My official review of the product.

I received a vouch copy and put in 2500 bits ~ 150\$ and used it for almost 2 days now to really test out the product.

Vocabulary, Grammar & Interface :

It's a simple ebook and a script included along with the ebook. It's easy to read and understand but there are a couple of grammatical errors which I'll point out to OP and should be corrected by the time y'all buy this product.

All in all a simple 2-3 minute read with decent font sizing which doesn't hurt the eye.

Seller's responsiveness:

Contacted the seller through HackForums PM system and replied almost immediately. OP doesn't use discord so the product will be delivered using Hackforum PMs.

Would be nice to have another form of communication system in place like telegram or discord

Profitability:

Started with 2500 bits and by the end of the second day, I was up by 1000 bits. Again the OP has included risk management techniques and teaches you how to not lose too much and not get too greedy.

My ATH profits were about 1500 bits but I ended up losing another 500 since I forgot to stop the script.

Overall:

I would say this will be a very profitable script if you follow exactly what the OP asks you to do and not go overboard.

I'd give it a 9/10 and would ask y'all to grab the first few copies asap.

This is finally gambling everyone. DYOR before getting into it and use proper risk management to minimise losses ?

Thank you and Good Luck With Sales OP.

Regards,
Hosmail

Why are two of the accounts you are using to advertise this script in the negatives.

I guess they decided to stop using the script. I don't control what they do, sometimes people wanna

gamble a bit.

eSp0rt - February 22, 2021, 9:15 am

Interesting. Maybe i can vouch for your script if you want.

My review for Chef's Bustabit script-

I've always been quite skeptical of scripts/methods like these because they sound too good to be true and too easy to profit from but to my surprise after receiving a vouch copy and testing it for a few days I have got back around 230% of my initial investment of \$120.

Although it is not always consistent as with any betting game the win percentage is definitely higher and a decent amount of money can passively be made through compounding your profits. Through his personal advice and the guide I easily setup the script and made a nice amount of profit without any effort straight away so for technical understanding you don't really need any except for how to read. Chef make's sure that you don't overbet and get greedy and to always take a small amount of profit over getting caught up in the rush of gambling, this is reiterated multiple times in the guide that comes with the script to make sure that you aren't losing your profits to the house over time and has proven true for now - I will continue updating my review.

I will also be providing proof of profits at the end of this week and next week for you guys.

I've received a vouch copy of this from OP. I've tried the script for a few hours when I had some time, didn't see the results I was expecting. I realize I need to run the script longer and it will probably have the potential to provide a decent return.

Will update this post when I get some time to run it again over the weekend. GLWS!

DrRespect - February 24, 2021, 4:28 pm

It's still gambling though, you're not guaranteeing a profit correct?

You have a much higher chance of profit with my script. Of course, nothing can be guaranteed, but if you follow my guide and script, there's very little chance you can lose money over the long run.

Honestly bro this is way too over priced and I'm saying this in the nicest way I possibly can?. Come on this is a script with less than 100 lines of code for what \$250? That's steep, and the accounts you posted got rekt and bad.

They stopped using my script. I will consider a price reduction though. Thanks
