Feedback would be appreciated - especially on color scheme as I'm yet to perfect coloring.

Also any suggestions for coloring etc?

Let me know

Updated version with darker colour gradient (not sure how I feel about it):

The transition to pink shade stood out as sore thumb for me.
Just how I feel.

I love the colors, they work very well together!

Only feedback from me is VISUALS becomes hard to read towards the right, if you made it a little easier to see, would be perfect :)

Appreciate the feedback.

I wasn't sure about the colours but I'm glad you like.

Could anyone recommend any learning/tutorials for colour work in graphics?

Badass, I like it. The blue to pink does stand out a bit tho, Could be a good or bad thing. Depending on how what you're going for.

As the first comment stated you should blend in the pink a bit more as it just appears in the corner all of a sudden. Other than that it looks very aesthetically pleasing, nice job!

I do like the style and the colors, even tho the transition to the pink color could be a bit darker, that would add more contrast to it all. Then when you combine that with a clean and simple page/site...it just works and it's close to perfect.

Great work op! :)
