Thread: [Escape from Tarkov load outs?](#)

Xen - February 19, 2021, 9:42 am

I've got a lot of rubles and I want to start playing around with different builds/load outs.

So send me some pictures of your favorite guns, meta or not. Meme or no meme I wanna see it all.

This gun setup has been Treating me well in high hitting Gunfights on interchange with BT ammo mate ,

Im new to the game managed to win around 20 gunfights with this loadout and grab over 2.6 m

Gun has a nice Kick to it would be even better with a silencer

Nice! Looks like a pretty solid gun. I've really been enjoying the AK 103 recently, I'm not a big fan of 5.45 AK's (the bullets themselves) but the 7.62 ones slap.

Yeah i was playing in a twitch tourney earlier and slapped people like 20 meters away and the gun is unreal for close combat probs best using it on interchange as its a big gun to peak corners with , if your looking for a small peak corner gun I would suggest AK-74U one don't know the name exact but its beautiful as a secondary for corner peak
