I assume this works as the normal uav in game would work so if they have ghost it wouldnt show up?

omy11 - February 20, 2021, 9:51 pm

How long has this been since it's been undetected?

3 months no chance of ban with this product

Hilfiger - February 21, 2021, 12:11 am

Hmmmm I'm interested. I need to be sure I won't be detected though. I am looking for an extreme low risk tool.

Infinity owner send me a vouch copy.

Works exactly as advertised and very easy in use.. ?

Indeed no running process prob does some ingame modification..

Not seen a concept before like this with Warzone cheats.

Good luck with sales ! ?

I downloaded the tool on your website and used a trial key but after scanning it, it detected a Phonzy trojan.

Something like 33/40 detection rate.

I'm not using this lol

Edit: the comments on the forum say "it injects into the game so its detected as a trojan" but on the page it says "doesn't inject anything in the game so zero change of getting banned".

iampro2021 - April 6, 2021, 12:47 pm

But, did you use it? and was it good?

I would like to know how this is 100% safe. It need to be injected so it can connect with the game right?

mr000096 - June 6, 2021, 2:40 am

need to buy this tool. I already send a friend request on discord.
