Thread: [What are payment methods you'd like to see in a payment processor?](#)

DamienVC - February 20, 2021, 7:41 pm

Name a few well-known ones that have yet to be included or integrated with existing payment processors.

As a seller, what gateways do you think your payment processor lacks?

Dopamine - February 20, 2021, 11:41 pm

We need something like PayPal but without chargeback. Yeah I know CashApp but only available for Americans.

That's not even the problem, cashapp is gay for a number of reasons, if you receive payments from non properly verified accounts it will fail all the time plus most banks still block it etc. As much as I hate gaypal I'm preferring it these days, the relief I feel when I see a payment just going through instead of failing is priceless when you've dealt too much with trashapp and monkeys who can't verify it properly or add to balance first.
