SnapBytes Live Snaps App

Introduction:

SnapBytes Live Snap is the most advanced marketing and advertising Snapchat tool for IOS & Android without jailbreaking or rooting your devices. Enabling you to send or post a high-quality live video or photo from your gallery or Camera Roll to your Snap Stories without compromising the quality of your media. You can add multiple photos with our in-app photo gallery. With our advance and easy-to-use features, it will make your marketing easier and faster!

IOS & Android Features:

- Live Snap - able to send HIGH QUALITY LIVE SNAPS of your photos and videos from your gallery/camera roll to your friends while maintaining the quality of your photos. Snap a story from your gallery/camera roll without the "From Camera Roll".
 - Photo tabs & slots - Pre-load your photos 7 tabs with 12 slots each, a total of 84 photo slots to organize and conveniently send them to your friends! There's no need to choose a photo on your gallery every time you send a live snap!
 - Scheduled post - never forget to snap a story again! Pre-load your pics and schedule a post with just a few easy steps.
 - Image crop- editing your photos to 9:16 (Snapchat standard photo) comes easy with this feature and automatically saving them for future use! You can manually adjust to which part of the photo you wanted to crop!
 - Script saver - easily save your pitch sales and video/photos/packages rates with our 10 slots script saver
 - Discord Server - a dedicated discord server for our clients to easily support and help them with our app.

Android Exclusive Features:

- Emulator - our app supports the following emulator [AndyDroid and Android Studio AVD]
- App head - easily access your pitch lines with just a single tap. Perfect for your marketing and advertising on Snapchat.
 - Tab Stories - a Story Tab Section without "from" when in Story.
 - Enable/Disable - you can choose to enable or disable the image crop and app head

IOS Exclusive Features:

- Photo/Video tabs & slots - Pre-load your photos and videos in our 7 tabs with 12 slots each, a total of 84 slots.
 - Dropbox - there's no need to store your photos and videos on your IOS devices. You can easily choose any media from your Dropbox account and edit them before sending.

- Video & Photo Cropper - unlike other apps that can only crop and edit photos. Our IOS version can even crop and edit your videos! There's no need for you to use your computer. You can easily do all the jobs with our app!
- Video rotate - along with the video cropper, our app lets you rotate your videos to make them look perfect, saving you lots of time!
- Scheduled post - Set a scheduled post and snap it with just a single tap! Option to repeat Schedules everyday at the same assigned time.
- Captions and URL Attachments - save your pre-made captions and URL attachments using the Attachments feature saving you extra time.

The versatility of this app is amazing. There are different sections for you to organize your pics, as I have a huge problem in finding a solution to this when it comes to sending out live pictures and seeing what I have already sent or not.

The app is quick and responsive, even on my shitty android device. The scripts add another layer to easing the workflow for giving potential customers rates or whatever you need to do!

After having some issues with that free sourced app I decided to purchase slots for this and so far it's working really well. I like the ability to stock up all my stories and pics to save me time. Great seller, was quick at responding and adding my usernames. Highly recommend!

Nope, our app is a 3rd party app for Snapchat and not a modded Snapchat. You can only send live snaps and live stories using our app with extra features.

Bought it today, Seller was really responsive and patient on Discord (helped me out with payment issue).

Everything worked out great and the app works as expected.

Thank you once again! :)

scheduled post feature is only for IOS version atm. yes, you still have to press send but if you have jailbroken device, you can make it automated. We also have unlimited package.

The cropping is automatic, all you have to do is choose the ratio if you want the 9:16 or 9:20 ratio. Snapbytes is currently the best app out there.

Me and my friend bought 5x usernames of this. I asked him if he added my snap username and i was going to ask for the download link to the app but he said that he don't tolerate sharing the

usernames. I didn't buy 1x username, i bought 5 so i think i should be able to "share" to whatever snap username i want.

I don't recommend guys!

EDIT:

What's the difference if i bought the app or not? He bought 5x usernames, he can use it as he wants.

Snapbytes - June 17, 2021, 6:53 am

You were not the one who bought the app so stop claiming that you bought the app. You are not our customer. You don't even have the "Contracted Customer". And if you were the one who bought the app, why were you asking for the download link? You said it yourself, your friend bought it and not you. You're just begging your friend for a free slot because you're too broke. Have a nice day!

Yes, it can crop videos on 9:16 ratio too. If the video is more than 10 seconds, it'll automatically split into 2 part video or 10 seconds parts.

After getting the Android app I've also purchased the iOS app today. I must say that both versions are running smooth and I've been using the Android app for a while now with zero complications, I

expect the same for the iOS. I noticed the iOS version has a bit more functions and I can't wait to test them out :). 9 out of 10 for me.

hello. i have 2 question. how much quality do you retain from original pic? is the resolution of the pic posted from your app same as original resolution or how much is the loss in quality?

would you say the image quality from you app is best on ios rather than android?

Hi, the app will upload it to the highest quality possible and to be honest, it depends on your network and Snapchat's server. Our app is just transferring the pic locally so whatever's in your gallery, is just being transferred using our app locally.

For your second question, I would say ios is better. Snapchat's android version is a bit buggy. There are some file extensions that doesn't work well with Snapchat's android version. I'm saying Snapchat, not Snapbytes because it's all about Snapchat. I can send you a test just add me on Discord

Hey man, project looks amazing.

Wanted to add you and inquire about one of the packages, but can't seem to add the discord above (says spacing, etc in the name causes it).

Gonna shoot you a message and hopefully buy this. Thanks!

Hi, I don't take PayPal anymore. I only take BTC, BCH, XRP, LTC, ETH.

You can use up to 5 of your snapchat accounts.

Camarade - January 3, 2022, 9:55 am

Hello

Bro you no longer answer me on discord, I've been waiting for more than 7 days to add a username,

You asked me for a photo that proves that I already bought usernames from you with the account, I just sent you a video and asking for your BTC address and still nothing..

And since you don't answer, I going back to my HF contracts, I realize that I bought 5 usernames from you, I used 3 on my old Discord account so I want to be able to add the rest.

Vouch for this service and app, it's really nifty.

Been using it for some time now, but one annoying thing is that it duplicates the images and videos
in your gallery and you have to manually clean it up. Other than that? Probably the best paid app
right now.

Hi, once the image is added to the app, it won't duplicate it. For videos, you can disable the video cropper once you have cropped it before and just use that.

There is hands down no app on the market that comes close to this. Nor is there any better support I've had when purchasing the product. Highly customisable to your liking where to pre-save photos or videos for quick uploads, no having to look through your gallery to find the one you're looking for, additionally there is perfect resizing for any iPhone / Android so that the photo or video fills the Snapchat screen just as if you took it from your actual camera.

After paying it took less than 30 minutes and I had the app ready to go on my phone. I stumbled into an issue at first as I'm not super tech savvy. Snapbytes then responded within minutes and guided me through what I needed help with and treated me with the upmost respect all the way through the process.

Do not hesitate to purchase this product or deal with this user. You will get your moneys worth and more.

Hello OP, I'm interested in purchasing Snapbytes. I wonder whether it's possible to send "live" pics instead of "from camera roll" using the app?

Is it included in the normal package or do I have to buy some extra features for that?

Thanks

Yes sir, it is possible to send "live snap" or post a live story. That's the main purpose of this app. 1 slot means it will only work with 1 snapchat account. 5 slots means it'll work on 5 of your snapchat accounts. You don't have to pay extra for the features.

+ VOUCH! +

I've been using this app for like a year or so. To be honest this was one of the best purchases I've made. This app saves me a lot of time and headache. Plus the whole process of adding and removing usernames is automated and very quick, and the app itself works flawlessly too. And the seller is very helpful, helped me on multiple occasions for free, even though I offered him to pay something for the hassle.

Recommended for sure!

[Snapbytes](#) Hello I have a quick question: does the snaps are sent like real snap? (Red icon and purple icon) or the content is sent into the chat?

I'm asking this because I've tried similar apps and the content was sent into chat directly instead of real snaps.

The contents are sent just like a real snap sir (Red icon and purple icon). You can also post a fake live snap story

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
