I'm looking for a l33t upgrade for six months for 4500 bytes.

My subscription got expired, only ub3r left.

You want \$28 - \$32 worth of Bytes (\$4 - \$4.50/per 1k) for a \$15 upgrade?

because bytes are overpriced imo.

And yes, I took a shot at a deal that I will benefit in.

If it's overpriced, as you said, it would be the opposite. I should offer you less.
