Thread: [Folding@home - Hackforums team. Top 10,000!!](#)

Mr. Robot - February 27, 2021, 10:28 pm

I have created a folding@home team if anyone wants to contribute.

<https://stats.foldingathome.org/team/1060014>

All you have to do is download the client from here:

<https://foldingathome.org/>

Once you have installed/run it - simply right click the icon and open advanced viewer.
Then click Configure + choose a name and enter the team number "1060014"

For anyone wanting to know what it is:

Folding@home is a distributed computing project aimed to help scientists develop new therapeutics for a variety of diseases by the means of simulating protein dynamics. This includes the process of protein folding and the movements of proteins, and is reliant on simulations run on volunteers' personal computers.

Keep in mind the team stats will appear after 1 work unit so give it a bit before your username shows up there.

>>If we get enough people on HF to run it, we can get to number one in no time as contributors to solving:

COVID-19

Alzheimer's

Cancer

Huntington's

Parkinson's

and others..

Marxist - February 28, 2021, 12:56 pm

I'll throw one of my 2080Tis into the team.

A + - February 28, 2021, 1:39 pm

Is there a minimum hardware requirement?

Marxist - March 1, 2021, 1:16 pm

(Feb 28, 2021 02:39 PM)A + Wrote: [\[CITE\]](#) Is there a minimum hardware requirement?

Nope. No minimum requirements. Just adequate cooling for your rig.

It does run AVX though, so I recommend setting an AVX offset if you're OC'd.

Maskin - March 1, 2021, 1:54 pm

So I can contribute and save humanity with my GPU? (or CPU?)
Good enough for me.

Mr. Robot - March 3, 2021, 1:55 am

Thank you for contributing, I have just started mine up on my new rig so should catch back up to you soon.

HOMODIN - March 3, 2021, 2:07 am

I'll throw in some of my hardware to the mix, mostly the stuff that is always on, it's not any epic hardware but it should be able to do at least something :3

Mr. Robot - March 3, 2021, 2:13 am

Anything over a few K points per day even on light folding power is PLENTY. It's like if everyone gave a few cents it adds up A LOT.

My average points on my new rig at full power is 552,673 points per day.

HOMODIN - March 3, 2021, 2:17 am

Oh god, my craptop gets just over 3.2k points per day...gonna push it over to my TV machine and server too...we'll see what it adds up to...
You must have some rather nice hardware there tho when you get that much ppd tho :3

Mr. Robot - March 3, 2021, 2:28 am

I'll make a thread on my new PC eventually - rather than just the build thread - waiting till I get some high def pics

Max GPU temp @ 100% = 136f / 58c
Max CPU temp @ 100% = 158f / 70c

HOMODIN - March 3, 2021, 2:37 am

Max CPU temp @ 100% = 158f / 70c
Ooooh, that looks really nice, I have seen that case before and I would actually want to build in it too but that doesn't fit my budget...both money wise and space wise :P

Mr. Robot - March 3, 2021, 3:05 am

(Mar 3, 2021 03:37 AM)HOMODIN Wrote: [\[CITE\]](#) Ooooh, that looks really nice, I have seen that case before and I would actually want to build in it too but that doesn't fit my budget...both money wise and space wise :P

I actually lied, let it run for a bit to calculate actual rates - it's around 840,000 points per day.

iLie, 3.3k ppd here and not 3.2k ppd...still doesn't get any better, but hey, it's more than nothing, right xD

Zero - March 3, 2021, 11:33 pm

Probably not gonna be strong as you guys but I'm helping as much as I can.

severos - March 3, 2021, 11:54 pm

Might wanna get some curecoins as well in the process: <https://www.cryptobullionpools.com/about>

NoneStar - March 4, 2021, 9:17 am

Interesting idea, cool to see this kind of technology being used for this kind of thing.

severos - March 4, 2021, 2:06 pm

(Mar 4, 2021 10:17 AM)NoneStar Wrote: [\[CITE\]](#) Interesting idea, cool to see this kind of technology being used for this kind of thing.

The only problem with current implementations is that they're dedicated to a single company, kinda impossible to decentralize.

But I think the future still bright for such applications.

We shall see! My servers have a 99.99% uptime right now ?

Mr. Robot - March 11, 2021, 5:44 pm

Team Ranking 11716 of 225484

If we get more people we can crack top 1000 in only a month or so

Marxist - March 13, 2021, 4:06 am

I might have another gpu on this in a bit. My clients rental period is almost up. ?

Neon™ - March 13, 2021, 4:25 am

First time I'm hearing about this, looks interesting unfortunately I have only my laptop with me right now. Is there anything in for you or not?

Mr. Robot - March 13, 2021, 11:36 am

(Mar 13, 2021 05:25 AM)Neon™ Wrote: [\[CITE\]](#) First time I'm hearing about this, looks interesting unfortunately I have only my laptop with me right now. Is there anything in for you or not?

Nope, nothing in it for me.

About to hit 10k.

Mr. Robot - March 17, 2021, 1:05 pm

(Mar 16, 2021 04:41 PM)Marxist Wrote: [\[CITE\]](#) About to hit 10k.
Would have hit it sooner but had to do a lot of rendering on my PC for work.

Nate - March 17, 2021, 2:12 pm

So do we get money for doing this as well I was reading the link one guy posted that we get dollars per points?

peachii hxcker - March 17, 2021, 5:18 pm

This is honestly a really cute idea! But I hate the idea of this random software running on my computer feels like it could be somewhat insecure idk

A Nobody - March 18, 2021, 9:46 am

This is pretty cool. Reminds me of the altcoin that was mined in a similar fashion.

Marxist - March 19, 2021, 4:21 pm

(Mar 17, 2021 01:05 PM)Mr. Robot Wrote: [\[CITE\]](#) Would have hit it sooner but had to do a lot of rendering on my PC for work.
about to hit 9K now. Threw my 3090 back into the pool.

Mr. Robot - March 19, 2021, 5:55 pm

(Mar 19, 2021 04:21 PM)Marxist Wrote: [\[CITE\]](#) about to hit 9K now. Threw my 3090 back into the pool.
Just wish I could run mine more often but work calls.

Marxist - March 21, 2021, 1:09 pm

(Mar 19, 2021 05:55 PM)Mr. Robot Wrote: [\[CITE\]](#) Just wish I could run mine more often but work calls.
I feel that. One 2080Ti is always on it. My 3080 and 3090 are only sporadically available for idle stuff.

Gonna hit 8K by like Tuesday.

Marxist - March 23, 2021, 9:44 am

Almost 7K. #swag. My predictions have been exceeded.

Trev - March 23, 2021, 2:03 pm

Max CPU temp @ 100% = 158f / 70c

this thing looks like a beast, I cant imagine the frames you could get on this playing games lmao

He B TeMy - March 28, 2021, 3:54 am

Just joined with my rx 580 that's worth more than when i bought it 3y+ ago :p

Marxist - March 28, 2021, 4:18 am

I was hoping for more contributions from hackforums tbh. I will probably stop F@H at 20m

Mr. Robot - *August 1, 2021, 3:36 am*

I've just setup again, will be running at nights when I am sleeping. Hopefully we can hit top 1k.
