First time seeing a tool like this, it's insane lol

How can you guarantee that we can't get banned?

Well there no inject in the game like cheats/hacks so it can not be detected.

But if you went around the map and killed everyone by knowing where they all you could get reported.

0% bans and i am 99% sure you will never get banned but only from reports.

**Imagine8** - March 3, 2021, 7:26 am

This is mega, might have to jump on this.

**yAS0N** - March 3, 2021, 9:27 am

this looks insane.. is there any vouch?

**Generation** - March 3, 2021, 10:10 am

BRUHHH no way LMAO, imma have to try this when I fix my pc

**Imagine8** - March 3, 2021, 11:44 am

The program is minimal and exactly what you would want, my warzone was instantly detected and with the flick of a button the tool minimised and went to work. Not a single bug and it functioned identically as a full-time UAV would. It felt more like a constant UAV glitch in the game as opposed to running a third-party tool. Great bit of kit and well worth the price.

Vouch for hacker, a real clean UAV tool.

**Jared** - March 3, 2021, 11:49 am

If you have some sort of trial for this or a vouch copy I would happily accept and potentially purchase after seeing it works. Let me know.

**Jared** - March 3, 2021, 3:15 pm

Easy setup, works as described and seems to do so without any flaws. Vouch for the seller, thanks for a smooth deal.

**qaisdev** - March 3, 2021, 3:30 pm

**SnowLeos** - March 5, 2021, 7:16 pm

Purchased, easy setup, works amazing in both Warzone and Multiplayer. Super satisfied with purchase Big Vouch.

Still works even with a update.

**LokeYourXord** - March 6, 2021, 5:46 pm

Hoping to buy this, have contacted the seller :)

Also I have a question: Is it just a regular UAV that stays on? Because it is claimed to be an

Advanced UAV, but an Advanced UAV also shows the direction the enemies are looking in, which going by the video, this one does not, it's only a regular UAV that is permanent, is this correct?

UAV is permanent and will show everyone even if they got ghost on.

Easy setup, great product as advertised

Vouch for this great product

**destinydicson** - March 7, 2021, 3:35 am

Going to purchase it now, will give feedback after a days use.

**Trevon** - March 7, 2021, 7:14 am

I have been using the product for roughly 24 hours. My conclusion is to buy it while its cheap.

Pros:

- The product itself does as described, and very well without lag/glitches
- You can still see enemies on radar after death/spectating
- Super easy to use, Common Sense
- Has never crashed itself, or crashed my game

Cons:

- Spoiler [\(Click to View\)](#)-You can't see opponent in the gulag
- Program loads slowly after key input (Could be my PC, test for yourself)

Rating 8/10

+1 Another one from The Hacker

Edit: With each use the program has sped up its loading time.

I wanted to drop my review here because I think I owe it to "The Professional Hacker".

The tool is great, it does exactly what it is advertised as (mind you, it's a regular but PERMANENT UAV, not an Advanced UAV so you will NOT see the direction of your enemies, but you'll know if they are on the same floor as you and behind the wall, etc). I also figured out partially how this tool achieves this and it's ingenious, seriously. I can see why he claims that you can't get banned for it, and honestly I think he's right. Unless this method is actively being looked for on your PC (and the other part which I can't reveal to keep it a secret), then you just can't get banned.

A little reminder to those of you wanting to use it: The tool NEEDS your game to be (unfortunately) in Fullscreen Windowed due to the way it works. It does NOT overlay a UAV on top of your game or anything, it uses the in-game minimap, map and compass to permanently show you the position of all enemies in the form of the regular red dots. It has also never crashed my game or anything (because it doesn't fiddle with the game files and it also doesn't inject anything into the game itself), and it's super easy to use, it's so straightforward that I'd be surprised if anyone would have issues with using this. The only con which someone else here mentioned, is that you will not see your Gulag enemy but that is totally normal considering how this method works, and there's nothing that can be done to fix it without injection and thus risking a ban. Maybe the only other con I see is that I would have to run the program for EVERY lobby/game I join, which does become a little bit annoying after a while if you forget it. I ended up making a shortcut in my Taskbar for the program so that I can launch it as fast as possible. But again, this is just incredible and I can only recommend it.

EDIT: I'd like to mention that even something as simple as a permanent UAV has helped my K/D tremendously. Since I play with friends in Europe (I'm in Asia), my ping is quite high so my K/D suffers a lot because of this. But since I now know if someone is about to rush me, or is camping around a corner, I can play actively against it (even better if it's one of those "Black Roze" skin players) and thus my K/D has been going up steadily again. I am getting the K/D now that I used to have before playing with a ping of 300ms+.

I'm doing payment asap! Struggling with paypal but will give a review when done.

Can vouch for this, works perfectly and quick and easy delivery!

I prefer this type of cheat as I don't like ESP or aimbot. This at least still leaves gameplay as natural as possible just with a permanent UAV!

Yes because it ain't an overlay of sorts, it is the actual ingame UAV that is on permanently, so it will 100% show up on stream.

You are too fast. I was just about to edit my message because i read some more posts that I felt like answered my question. I only ask because the game already eats up most my laptops resources. Will probably purchase here soon

EDIT: is this a resale?

**Bubbers108** - March 15, 2021, 2:59 am

Great product, extremely easy to use and setup. Played a good amount of games and seen my K/D go up greatly while still being able to be lowkey. I would recommend this for someone who is new to cheating or even experienced. Thanks again.

**cybr** - March 15, 2021, 6:46 am

I've been using this for a little less than 24 hours, with a solid few hours of gameplay.

- This works as expected
- Does not lag/crash, or interfere with game
- Setup/Use is very simple
- You get your money's worth fairly quickly

VOUCH+

Generally, if you completely reinstall Windows 10 then it still does that as it generates a new HWID almost every time you reinstall Windows 10 (if you delete all partitions on the main drive and create a new C: drive, then it always does that).

Just message him and ask him to reset your HWID.

Highly unlikely you would get banned only from reports if you went around and killed everyone every game, only get a spoofer if you've been banned in the past.

You need to clear the trace files and get a spoofer as they've most likely HWID banned you. Infinite spoofer is a good one.

This looks awesome, I would buy if my PC runs warzone :s

**iampro2021** - April 8, 2021, 2:30 am

Could you tell me how this is 100% safe? there needs to be an injection otherwise he can't connect to the game i guess?

I see that in the last 2 weeks several people offer this at once. All for the same price, the same loaders and the same working method. However, no one can tell me how this is safe.

**The Professional Hacker** - April 8, 2021, 7:41 am

Yes this is 100% safe and had 0 bans

**iampro2021** - April 8, 2021, 12:11 pm

I understand you're saying it's safe. But I don't have an answer to my question yet. How can this be 100% safe? an injection must take place otherwise the program cannot connect to warzone. He needs to get his data somewhere.

Sellers claim that no injection takes place, however this does take place. You have to open the game, then the .exe and then press f12. Then you get an advanced UAV. So he connects to the game which means he injects something.

I don't want to come across as a whiner, but I (and maybe others) would like more information about this. I think you recently created a post or someone has a good warzone hack. a few weeks later you sell an advanced UAV. I am curious if you can tell me more about this method

I can not sell the method but yes it works as a advanced UAV.

**iamp2021** - April 9, 2021, 3:02 am

Well, still dont have a answer to my questions. I'm not asking about your method. I'm asking about the injection.

1 seller is claiming that there will be a injection.  
other seller is claiming that there will be NO injection.

Meanwhile, its the same program. The same interface and the same methode.

I will stop this discussion and wish you the best of selling this good looking product.

yeah i was banned twice using that tool, and at that time no one from the staff team cared about that banwave that was happening and they would simply ignore it or even mute you in their discord server if you say something about that. In the end i got banned from that discord and after that they reliezed their tool actually causes bans so they "remade" it.

I have to say tho that i have used this new remade tool for a couple of days and i have no problems and bans so seems like they fixed their issue, but that does not change the fact that their support is awfull and ignorant.

It works just as advertised but it crashes a lot. There's a 100% chance it will crash at least once if you play 5 - 10 games. It's not too much of a problem to me because I can load back in really fast, but it might be annoying for some people.

Even if external it can still easily be detected through signatures, processes or even obfuscation, it's daily when dealing with proper anti cheats like vanguard.

However activision is too lazy for all of that though so i doubt they will do the effort ?

I don't understand how people still enjoy the game even though their using hacks? No disrespect to the person who developed this hack, you truly are great in regards to your coding abilities. But I just can't imagine playing a game, letting a hack do all the hard stuff, then what am I doing? Hacks takes the fun away from gaming, you're better off watching Netflix cah you're literally doing the same thing

I used hitman's cheats while playing earlier cod titles. Thankfully, I was never banned on this account. And I used hacks from other vendors, resulting in me regrettably getting blacklisted. Excellent service. With that said, I'm going to test out the uav tool for the newest game and report back.

Edit: The MW2 UAV Tool I purchased is functional. Even while not all game modes function perfectly, you can see when enemies shoot on the map and, if you have a UAV, you can watch them for longer than usual. I'd like to believe they are working to make the tool better.

I have not yet received a ban since the Season 1.5 change.

I'd like to buy the unlock all for Warzone 2.0, but I'm curious. What's the lifetime option for it? Does this level my multiplayer rank up as well? Do camos stick? And does this unlock skins usually earned from battle pass as well?

Hello yes the camos stick and wont rank up your level you have to do that in game.

Sounds good, do I need to buy a battle pass to unlock those rewards or is it not needed?. Also

what's the lifetime about?

Yo I was planning on buying MW2 soon, and I don't want to grind for everything so I want to buy the unlock, but it says Monthly or Lifetime payment? I'm confused about that, as wouldn't it just be a one time thing and everything is unlocked permanently? Or do you get the tool to do it yourself (Like on the JTAG xbox 360's back in the day) So you can do it for other people in lobbies and you have access to that either for the month or lifetime?

Thanks man.

**AverageScumzy** - October 20, 2023, 2:18 am

From my experience this is just a simplytoolz rebrand. Half of the community is selling this exact rebrand by them. What makes you different?

Your prices are also a bit up there compared to other rebrand's...

just a few qs:

1) how come you only offer 1 month? I'm assuming I have to run the program once and I've unlocked all guns permanently right?

2) Any tips on how to avoid being detected?

**IllegalMover93** - December 20, 2023, 1:06 am

Does this work with new warzone?

Its not injectable hack so does the aimbot work as well?

**G33K** - January 23, 2024, 5:50 pm

I can buty lifetime but i never buy anything but testing it first so i can buy a day or two, if i like it i will pay you extra for the hassle So u make a win anyway.. If i dont like it im not gonna get stuck with a lifetime hack i dont want, alkredy did this to 3 diffrent vendors.. So if u are willing to let me test it im totally down... But i dont bnuy the pig in a sack.. Sorry it isn't that i dont believe you.. But the main goil is that im happy and if im not u still made money...
