Thread: [Insane 100k+ Trading Profits + PICS](#)

triangl - March 3, 2021, 3:27 pm

Thought I'd post some member gains from the private stock investing Discord community I run. Currently sitting at over 550 members to date!

These screenshots amount to just over \$100k over the span of a month or so.

Here's some trading motivation, check it out!

Nice. Investing is the way to go.

I'd like some details about the group, you can PM me.

Other than that, good looking results. I'm into crypto and feel like I can make more gains in crypto compared to stock.

Majority of the market been down lately, what you want to do it protect your portfolio by either hedging your long term positions if you trade options by getting into inverse ETF's if you trade stock options.

Definitely agree. However as the market dips, it's a great opportunity to buy in. Always keep a percentage of your portfolio in cash for this reason!

That's amazing, you're probably very proud of what you have accomplished. Congrats!

If it's a signal group with a fee, I could be interested. Let me know I have a good amount of money to invest.
