Thread: [Send an e-mail as any email address/name](#)

ahmmu - March 4, 2021, 8:45 pm

Video link:

<https://www.youtube.com/watch?v=GPmvAoHm1Qk&t=5s>

This basically shows you how to email spoof on a basic level. It works really well as long as you don't use any big domain names like Google or Instagram!

100% Inbox rate, uses your Gmail SMTP Server. No setup required.

Run in VM, as I got the download from a rival forum.

Like and subscribe :))

blxrry - March 12, 2021, 9:04 pm

the video doesnt exist anymore

iamlonelyak_ - September 23, 2021, 9:31 am

Hello ther can you send me the video sir, as i cant acess it through youtube it is deleted

TheRealToxic - September 25, 2021, 5:17 am

Yes I think this works right if you do it.

TheRoyalGamer - November 29, 2021, 9:42 pm

please send me the updated link

Can You still provide the video by any chance? I'm very interested

Can You still provide the video by any chance? I'm very interested

DAIZON - June 28, 2022, 9:12 pm

the youtube video link doesn't work

Video unavailable

can you uplude the video?
