Thread: [\[Spoofer Network \] dedicated, vps, hosting servers allows spoof of list websites.](#)

BlackLayer - March 5, 2021, 5:44 am

This two part new thread for update.

You can read reviews old my thread here <https://hackforums.net/showthread.php?tid=6094814>

<https://spoofer.network/>

You don't need to overpay resellers for spoofable servers, here with my service you can directly buy.

Sincerely we have best service, a weekly update and now we have discovered total (55) so (33) websites that allow spoof and unfortunately (22) has stopped spoofing.

Join us Telegram channel for notification new, update, edited. <https://t.me/spoofernetwork>

Vouch

We don't offer vouch is enough because already a lot of positive from customers.

STOP ASK ME PAYMENT FROM PAYPAL, ONLY BITCOIN!

BlackLayer - April 25, 2021, 11:40 am

Sorry about site offline 32 hours under attack L7 because hosting has not enough DDoS protection we have new large hosting now is better don't worry we have reset membership backup restore database, Thanks for understanding.

darkair - April 25, 2021, 2:31 pm

kinda don't understand what this is, i'm just dumb i guess

BlackLayer - May 1, 2021, 3:18 am

How could you not understand? Read homepage / screenshot <https://spoofer.network/home/> I hope you understand now!

darkair - May 1, 2021, 4:32 am

I understand that you're curating hosting providers that allow spoof , but what is a spoofer used for?

BlackLayer - May 1, 2021, 4:58 am

theyre used for something i think is called dildooing, basically you turn off someones internet

BlackLayer - May 23, 2021, 6:31 am

I got clients 29% about expensive fee from BTC, so today update new website I put the payment method new BCH and ETH. Good luck ?

Montick - June 5, 2021, 7:25 am

I'm new in these hacking can any one help

BlackLayer - June 5, 2021, 7:35 am

(Jun 5, 2021 07:25 AM)Montick Wrote: [\[CITE\]](#) I'm new in these hacking can any one help What? is much the option "hacking" what you looking for exactly?

I'm just service information provider spoofing.

The Original - June 5, 2021, 2:53 pm

i see you don't offer vouches but i once was the biggest spoof server hosting in hackforums back in the day so if you want a very trustworthy and experienced vouch for your service im here :)

BlackLayer - June 5, 2021, 2:57 pm

Sorry, we don't use anymore voucher already use old thread that's why a lots clients no needed voucher.

BlackLayer - July 13, 2021, 7:34 am

Update: added new page section scan and add features feedback. good luck ;-)

sakli - February 1, 2023, 4:02 am

I have member become it but info are not %100 trustly and not working. I have 2 server buy doesnt support spoof, Your resources is not correct.

If you are running a service to help consumers purchase spoofable servers then shouldn't you double check your list of hosting? I see you had 55 server hosts spoofing, but now you say you only have 33. Why would you still keep the other 22 that no longer allow spoofing on your panel? That customer that sent you a message saying he is out \$280 USD seems like it could of been avoided.

Two provider added from two year ago unfortunately clients haven't test and nothing report from two providers that can be happend still spoofing or not already give him warning but why client accept risk? So not my responsibility.

Terms

"We are not responsible if one or certaine hosting providers stopped the IP spoofing, it can happen for any reason."

Sorry happend that, recommendations check reviews and new date update not too old.

BlackLayer - July 2, 2023, 10:06 am

Big update, we are excited to announce that we have added new 5 providers that now allow IP spoofing.
