Thread: [\[WTS\] 200M OSRS gold, \\$0.6/M BTC/ETH](#)

Pixie Interactive - March 5, 2021, 11:12 am

As the title implies, I have an old account I've played since 2001 with about 200M on it right now.

I just don't get the time to play anymore, spending most of my time between my job and crypto markets. So now I'm looking to unload my gold to someone who'll enjoy it more than me.

I only accept BTC and/or ETH. You will go first - I'm fine using a MM service or escrow, but you will pay the fee.

Delivery happens as soon as payment is confirmed.

\$0.6/M BTC/ETH or \$0.5/M if you buy the whole lot in one go.

[contract=tid]Start Contract[/contract]

(The account is also for sale at a reasonable rate if anyone is interested in that. - I can provide a RSN for hiscores in PM)

Lorem Ipsum - March 7, 2021, 5:02 am

I'm not here to sales thrash or disrespect your business, but you insist on the opposite party to go first or to pay fees for a MM while you're the one with 0 Contracts completed.

Again, don't get me wrong, but \$0,6/m is already expensive. Compared to other GP providers, include MM fees to that and you will get a hard time. 200M for \$0,5/m is getting more appealing, I can't deny that. Good luck with sales!

The entire supply has now been sold. Thank you.
