Thread: [Malwarebytes Lifetime Keys - \\$4 each - BTC](#)

Jason - March 6, 2021, 3:43 am

I have 10 malwarebytes lifetime premium keys for \$4 each. I can sell them in bulk for \$3 each if you want. Payment method is BTC ONLY! If you want proof, I'll screen share the keys cause they'll never get cracked as they are activated on virtual machines.

Can't you just simply google for these keys?

I can remember you could a couple of years ago, and weirdly enough all keys found on google worked.

I guess that might be before malwarebytes 4.0. The company started to consider lifetime keys as pirated keys and shouldn't be used. Apparently, they have no system to detect that. You just activate it and you have it forever.

I already sold 1 and selling the other. I'm sure these people will provide a vouch. Thank you.

hey brother im interested let me know :) added u on disc my name is actavis on there

Received a vouch key from OP. First off, it did work, but I feel I need to mention that the key

originally had a device limit on it and OP had to do something on his end to allow activation. So, they aren't immediately redeemable and working without having OP on standby.

Otherwise, the key did work in the end and is legit. You guys can feel just that bit better moving forward to buy.

These malwarebytes codes are cracked, you just load up a bunch of proxies and run em through openbullet until you get hits. It's against the terms.

If you accept Paypal or Cash App I would take one off your hands

I'm happy to tell you, it's not that way. These keys are legitimate and they don't come near "cracking". You take full ownership of the key to activate/deactivate it on only 1 device at a time. The company itself made those keys.

I can't use cash app from here and my paypal doesn't accept funds. It might though, but maybe a week later. So, my hands needs some BTC.

I Need one, please dm
for 4\$ that's easy

bk randy - April 25, 2021, 7:20 pm

Just spent \$34 on mine due to BTC fees...

Nevertheless, for \$4 this is a steal, I'd personally charge \$8, and would pay \$5-8 just fine.

OP you're doing a great job! Keep it up man! Maybe generate a few batches of these to save for later sales in case it gets patched.

HaX420 - April 28, 2021, 2:50 pm

I can vouch for this. I Just purchased one and everything went smooth and is working as it should.
Crypto fee's are high but shit, it still cost less then a yearly sub and never expires. Totally worth it.

leekzyy - June 16, 2021, 8:36 am

Really good guy, fast process and no problems. I recommend!
