Thread: [Where i can buy undetectable keylogger?](#)

DrOverBet - March 9, 2021, 1:07 pm

Hello gentlemen, I'm looking for a place or person who will write a simple keylogger for me.

I need only:

- undetectability
- keyboard logs
- sending logs on e-mail

I am asking people with appropriate experience on the forum to recommend a suitable place where I can buy such a program.

Btw I'm also looking for a keylogger for mobile.

If anyone helps me with this, I will get paid.

Best regards.

DrOverBet

Also dont pay anyone upofnt unless you deal with a really trusted seller, by posting this thread most of the people will just try to scam you

Btw I'm also looking for a keylogger for mobile.

If anyone helps me with this, I will get paid.

DrOverBet

you cant buy a fud keylogger, most of them are used by many people therefore heavily detected. however you can use a paid keylogger and a good crypter to make it FUD

bellodipapa - March 10, 2021, 10:36 pm

You will need a crypter or crypting service to get the keylogger FUD

DrOverBet - March 11, 2021, 4:44 am

Thanks for your answers.

I outsourced the work to one forum user.

I will let you know when I get the product and test it.

If everything is fine and the crypter agrees, he will recommend it in this thread.

Greetings

I can code it for you but it will takes 1 week to finish it.

Or you can buy any keylogger and crypt it using HQ crypter
