Thread: [Help needed - Mybb Header CSS](#)

{NB} - March 12, 2021, 8:12 am

Hi,

is there anyone who could help me with a mybb Header? I can't post the code here, I would pm you.

The problem is that the welcomeblock has to be inside the menu, or the if possible menu/welcomeblock into the header (responsive).

The problem is that the welcomeblock has to be inside the menu, or the if possible menu/welcomeblock into the header (responsive).

If it's just manipulating CSS, I can help.

Or could someone include a header from one theme to another one?
