Thread: [Free Blockchain Wallet Recovery Tool](#)

Goated Degen101 - March 12, 2021, 10:05 am

Sup guys. If you ever lose your password to a wallet ID from Blockchain this will help you recover it. Use only for your own recovery! Proxyless as well. N00b Friendly.

I have many more useful tools I can drop if you find this one useful. Stay Tuned!

<https://www.virustotal.com/gui/file/b5410c9e44beb8dd834e15561b449c42e89649a60575ad0c922437b69ae00790/detection>

DL: [deleted]

Let me know if I should start a poll for the next drop!

Exalted - March 12, 2021, 10:13 am

Don't fall for this shit.

[BLOCKCHAIN WALLET ID BRUTER.exe \(5/68\)](#)

[Browser Extension.exe \(21/70\)](#)

Read Me.txt Wrote: First go ahead and install the browser extension.

Open your browser. I've only tested on Chrome. Not sure if it works with any other browser but you can try Firefox and see.

I also recommend running this on a VPN if you have one. If not all good. I have supplied some [censored] accounts for you to work with.

Next thing is to create a passwords.txt file and paste your password list. Don't have one? I have you covered with a basic example.

Paste in the wallet id you need to recover and then just run it!

Only working for Blockchain.com

Enjoy Niggaz!

Lynx - March 12, 2021, 10:20 am

Yikes. Are you actually this retarded that you believe this works or are you spreading your own shitware?

Most Chrome extensions I see are either .zip/.rar/folder (unpacked) or .crx (packed). [Goated Degen101](#) couldn't be more obvious ?

Stetsed - March 12, 2021, 10:29 am

This is just.... Bruh. Seriously my dude what the flip. This does nothing except brute force with keywords(If it does anything, I cba to test). Which litterley is the easiest shit to code.

And I bet my left nut you either put a RAT in here. Or some other malware from yourself. So please, fuck off

Well, there we go ?

Get this man closed as soon as possible.
