Thread: [The government and fame world want me to be a gay, would you?](#)

Wealthy Hacker - March 12, 2021, 12:21 pm

If God warned you not to be gay many times, and exposed them as deluded devils that burn, would you be gay?

I'm quite a spiritual being. Possibly some kind of angel alien. Celebrities know this, as I've been blessed before their very eyes a number of times now.

They deceived me for a long time with fake news, terrorist attacks, earthquakes and whatnot.

Seriously though, I'm already rich and I've still got my soul, God is for me.

I can be very spiritual depending on my mindset/how I feel.

God bless you and have a wonderful life HackForums member. Yes you. This blessing goes right to you. Enjoy the money! ?

Man and woman are the only gender that the Lord have created and we have to stick with it.

Good to hear that you've got all wealth you need bro.

Good is good all the time just trust His will and everything you need will be given unto you.
