Thread: [----- BEST GAMBLING STRATEGY THAT EXISTS, PROFIT PROFIT PROFIT PROFIT and PROFIT-----](#)

OliverSc - March 12, 2021, 3:57 pm

This thread is for those who want to invest a good amount of money and get BIG profit with the BEST mathematical model that exists as of now.

If you're looking for another ebook to get 10000\$ per day as they advertise, that's not the case.

If your budget is around 100-1000\$, that's not the case either, check the prices of my product below.

The method has to do with the best gambling strategy, if you're not interested don't spend your time reading it.

THIS IS NOT ANOTHER SCRIPT-SELLING THREAD.

What is it about?

I'm working for scripts-mathematical models-statistics over 3 years. From my experience the only way to minimize the risk is if you minimize the lose streak odds. So, I created a mathematical model that minimizes the risk after searching crazy streaks under a target-multiplier.

I'll provide accounts that ran this model, found such streaks and they have very low streak odds to bet on them.

To set the risk factor even lower, I set the profit around 15% of the initial deposit. Check below the lose streak odd's table to see the chances of losing.

Previous Threads of the manual version:

Link 1-> [!!==\(BIG PROFITS WITH PROOFS\) VOUCHED BEST BUSTADICE-BUSTABIT-ETHERCRASH METHOD==!!](#)

Link 2-> [Bustadice Mathematical Model](#)

What is the risk?

The model that I'll run in each account has the same lose streak odds of a 26 streak rolls under 2x. I searched in over 1,000+ random seeds on many gambling sites and I can say it's not easy to find such streaks. Each bet is independent, I don't say that there isn't a chance to find a 27 streak but it's

probably extremely rare (never found 28 or 29 in ANY SEED, feel free to verify it by yourself). I can share in which casinos I searched for streaks if its needed.

Here you can see the Lose streak odds:

Spoiler ([Click to View](#))

How often is to find such huge streaks?

Around 4-8 million rolls PER ACCOUNT. An account with my program is able to skip around 300-800,000 rolls (it's 100% related with the connection and the proxies). So it'll take couple days for each account. As you understand even with the automated program it's very difficult to find such streaks. That's why risk level is so low compared with the previous version of this method.

What is the pack that I'm selling?

I will not sell the automated program, I don't care about your offers. The pack that you'll receive as you buy a copy is:

I'll pay for the RDP to run the automated program.

I'll run the automated program in the accounts. Once an account is ready I'll give you the Username and Password. You're free to change it, set 2fa, email and then deposit to bet. In my terms below as I mentioned I'm down to use Middleman so you can secure the accounts before the payment.

I'll pay for captcha.

I'll pay for proxies.

All you'll need to do is to bet and make profit when I give you the accounts. You don't have to worry about anything else, I'll take care of all the problems.

Packs:

You'll receive a pack of 13 accounts and price will increase after every buy.

1st will be sold for 1250\$

2nd will be sold for 1500\$

3rd will be sold for 1900\$

4th will be sold for 2500\$

5th will be sold for 3500\$

+600\$ per 5 accounts if you want more(obviously after you buy a copy).

As I said above you'll win 15% of what you'll deposit in each account.

TOS:

- I know the value of what I'm selling so I will NOT accept ANY other offer.

- Don't message me to waste my time and your time. I won't give discounts, it is what it is.
- Feel free to message me for ANY question if you're serious buyer here.
- I accept Middleman to deliver the accounts so you can secure them before the payment.
- If you buy 2 copies you'll receive in total 26+4 accounts.
- I accept only ?itcoin.

[contract=tid]Start Contract[/contract]

Might want to add some type of proof and maybe a gambling account showing your account going from 0 to your win / rate or whatever.

Also, how do you know for a fact this is the best gambling strat? Bit reaching, but GLWS either way.

Proof - March 12, 2021, 10:27 pm

Also, as I mentioned I accept middleman so everything is more safe for buyers and me.

I'll take an order of proof with a side of screenshots and a little bit of evidence this works and is legit. Thanks.

EDIT: Let's see some payouts as well.

eSp0rt - March 13, 2021, 8:26 am

More than 1K\$ for gambling accounts with a big streak seems pretty high for me.

But GLWS.

OliverSc - March 13, 2021, 9:05 am

(Mar 13, 2021 09:26 AM)eSp0rt Wrote: [\[CITE\]](#) More than 1K\$ for gambling accounts with a big streak seems pretty high for me.

But GLWS.

13 accounts, each account win 15% of the initial deposit. I think it's a fair value and it's for those who have big balance.

Thank you for your comment though buddy!

Gracioso - March 16, 2021, 11:54 am

you say i'll win 15% of what i deposit. how long will it take to win that 15% and then can I run again and win another 15%? or is that account done then? please explain.

OliverSc - March 16, 2021, 1:39 pm

(Mar 16, 2021 11:54 AM)Gracioso Wrote: [\[CITE\]](#) you say i'll win 15% of what i deposit. how long will it take to win that 15% and then can I run again and win another 15%? or is that account done then? please explain.

Instant, the accounts that you'll take are ready. You will just secure them by changing Password, setting email and 2fa. Once you win in the first account you just transfer your funds to the next one. It'll take only few seconds to win the 15% the streak will be ready and the lose streak odds will be as low as I explained above in my thread.

Feel free to message me through DM or Convo if you want more info about it.

Gracioso - March 17, 2021, 5:28 am

You do understand that every gambling product that's been sold on HF has eventually lost, right? Gambling isn't meant to be predictable, no matter how much math you use. That's why they will always profit, it's a game meant for time pass and fun, not a money method. You can get lucky, yes, but luck runs out.

People can probably make a slight bit of money with this, but it won't be consistent. Besides, why charge \$xxx for something where you'll take 75% of the profits? Doesn't make sense, you'll be milking them for more money without much return on their behalf.

Take A Risk - July 23, 2021, 8:14 am

What education or background do you have in statistical analysis/quantitative analysis? Do you have a degree in any of it?

Realistically, if this was remotely possible, those with QA degrees would've replicated it 1,000 times over and would be extremely successful and wealthy.

Then again, who am I? I just work as an analyst and have a Masters in Risk Management. I certainly have no idea what I'm talking about.

I studied engineering and many courses about statistical analysis, but I don't understand why you're interested about my background.

I explained that every roll is independent but as you can see above and as you can know from statistics there are lose streak odds. I mean there's a chance of a 25 2x in row, but the lose streak odds is so low that it more likely that you'll find the 2x soon. It doesn't mean that it's not possible that you can't find a 26th 2x or 27th or even 28th 2x in row. But from all the gambling sites and all the

databases that I researched and all the seeds I wasn't able to find a streak that would be able to make the customer lose. THERE IS A CHANCE though and I explained that clearly at my T.O.S. although so far, all the customers were very satisfied as you can see to my previous threads.

(Jul 23, 2021 08:23 AM)Take A Risk Wrote: [\[CITE\]](#) Imagine giving me -3 for saying what i think about your product very mature of yourself Imfao!

So why are you selling a profitable gambling strategy? Why not just throw a large sum of money at it and flip your funds consistently?

You "studied engineering and many courses about statistical analysis"? At what level? Do you have a degree? In response to why I am interested in your background -- would you trust a doctor about medical advice, or would you trust a homeless man? Which would likely provide valuable analysis or information? Qualifications matter.

OliverSc - July 23, 2021, 8:45 am

Yes I have a bachelor degree. About the analysis that you asked, I explained on my post above, I researched many seeds from many gambling sites and I set the lowest lose streak odd that I was able to find in their seeds + some extra seeds that I added manually. All the strategy is based on lose streak odds that exist currently to all the gambling sites as I clearly stated. I'm using the strategy for myself and I'm also willing selling accounts. I don't sell the program itself, I sell only accounts with such low lose streak odds.

As it's profitable there's no price that would make me sell the program.

Creating new accounts and selling them is just an "extra" profit for me, nothing else but this. I'm looking for people who're willing to invest more money that I'm investing so they win big and buy more accounts from me. Simple as that.

Take A Risk - July 23, 2021, 9:11 am

Great hit for today.

x_x - July 23, 2021, 3:06 pm

You can't beat a crypto casino no matter what bullshit gambling strategy you have, if you could then they just wouldn't operate anymore. If you have so much faith in your strategy that you'd sell it to other people then how are you not a millionaire? why not just put every cent you have into it and repeat the process? You literally showed a screenshot of "Win probability 49.5%" you must be stupid if you don't understand that means it is a losing gamble. The EV of a 49.5% bet with a 1% house edge is for 1 BTC your EV is -0.01 BTC per bet.

OliverSc - July 23, 2021, 3:11 pm

This kid thinks People on Hackforums are easy money but when we call him out we trolls.

OliverSc - July 24, 2021, 1:29 am

(Jul 24, 2021 01:03 AM)xc0z Wrote: [\[CITE\]](#) Anyone with half a brain wouldn't buy this. Gambling isn't long term income. Never will be.

Thanks for the free pump.

Anyone who wants the best gambling strategy will buy this, whoever thinks that gambling is a job, surely it's not.

But people can make big profits as the strategy uses the lose streak odds. Instead of manual gambling their money it's way better to use a strategy based on mathematical model.

Stanley - July 24, 2021, 4:09 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Says a guy who sells gambling scripts haha.

My method is based on mathematical model, it's not another scamscript like those you sell.
"Mathematical model" ahahah Just wait for a lose streak before bet nice mathematical model dude

....

1k \$ For this joke seriously ?

Anyway i'll stop comment on your thread. Have a nice day

Someone need to delete this post and ban this clown

webdev77 - July 25, 2021, 7:04 am

Closing the thread due to excessive reports and OP being a tool to other members about it as well.
Not wasting my time on this nonsense.
