Thread: [URLs \(non-hyperlinked\) are no longer clickable?](#)

Exalted - March 12, 2021, 4:29 pm

Plain URLs are no longer clickable, it seems, only hyperlinked text.

Examples:

<https://hackforums.net/member.php?action=profile&uid=4541508>
[Exalted](#)

<https://www.virustotal.com/gui/file/b5410c9e44beb8dd834e15561b449c42e89649a60575ad0c922437b69ae00790/detection>
[VirusTotal](#)

Can we get this fixed? Annoying to have to copy URLs each time, unless this was an intentional change, of course.

sneezing panda - March 12, 2021, 5:27 pm

Not sure tbh. Could be intentional though so people don't spam links. As an aside, LinkigyPlusPlus (or whatever it goes by now) will make all URL's clickable in browser. It's a userscript.

Omniscient - March 12, 2021, 6:41 pm

Actually we did an update because of some mybb exploit. Could have broken the functionality. I'll have to review the code change again. Make sure I did it correctly.
