Thread: [c# modify string in compiled c#](#)

mayar2021 - March 13, 2021, 6:29 am

hello

i want to ask how to modify string in compiled c#,
i donot like CODEDOM as it has limited functions!
if i compile c# application , how to make another application that change string in the first application?
looks like the stub in crypter?
thanks

Obistone - March 13, 2021, 8:59 pm

[dnlib](#) can do it.

mayar2021 - March 14, 2021, 7:47 am

how to use dnlin?

3 weeks i tried to use dnlib , i cannot.
could you help me? to change the string in the stub
