A very expensive shitshow i personally lost \$25k usd in this debacle, but the ex-CEO is personally guaranteeing \$300k USD for 4 devs paid \$70k each.

This is quite literally your once in a lifetime opportunity to own a blockchain company if you can assemble a team. Tomochain is giving it away for free.

I'll give you some credit for having the balls to post this, knowing that I'd come to roast you. The entire HF community warned you.

Lition is donzos, the new owner will simply hire his buddies to siphon the 300k while secretly dumping LIT tokens. There is already another coin that uses "LIT" coin name and has beaten them in market cap. This is the nail on the coffin.

That's what confused me, cuz I staked LIT and I don't remember it being 0.01 cent a token lmao. Litentry ftw!

yeah it's called i experienced and went thru some shit in life. There were countless days in 2020 where i could've died or gone to jail. Makes you see the world different. I just wanna be a ray of sunshine or like a flower in people's lives, because i know Angels watch over and protect me.

I hope you can change your cynical way of seeing, and are able to see the good in people. Your view is filled with evil intentions.

How? Imao I bought LIT too, saw them doing nothing sold shortly after. I told people in the thread not to buy it. I'm sure people who thought twice are happy they didn't buy it. There is zero malicious intent behind it, I didn't gain anything for it dying.
