Thread: [HQ SPREADING SERVICE | HQ BOTS | VARIOUS TRAFFIC METHODS](#)

**Rezpy** - March 16, 2021, 9:59 pm

MOST TRAFFIC IS FROM ENGLISH SPEAKING COUNTRIES (USA, UK, CANADA, AUSTRALIA).

You can expect to get anywhere from 300-800+ installs every week (you need to keep in contact with me after you place the order and I can give you the total number of downloads daily).

You will get better execution rates if you can bypass SmartScreen + have good persistence and long time FUD. I am long for long term relationships and am also interested in partnering if there is something interesting being offered.

All traffic is organic, no use of EK/0-1 days/reselling loads

Prices:

Gaming Targeted- \$215/biweekly - \$360/month

Cryptocurrency Targeted (Gambling focused) - \$300/week - Monthly price available upon request

Payment Methods:

BTC/ETH/XMR

Contact:

Jabber + OTR: rezpy@thesecure.biz

Telegram: @rezpyhf

or send a PM onsite :)

Terms of Service:

No refunds

No spreading ransomware or warez for financial fraud.

Make sure your file is FUD, if your file is not ST and RT FUD then you may not get (as m)any executions.

After you get the install, I am not responsible for anything you do with any of the bots.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

So if someone has a miner, you are selling distribution?

This is essentially what a spreading service is, so the answer is yes.

some review or feedback at service?

**Lextian** - April 14, 2021, 4:55 pm

Will be back once i see some reviews from trusted users to give this a try.

What types of CPU/GPUs can I expect with the gaming targeted installs? I need computers that have an okay CPU / GPU for mining, I want to make sure I can profit.
