Thread: [Professional Penetration Testing | \[SQLI / XSS / CSRF / RFI / LFI / RCE \]](#)

Kr?nus - March 17, 2021, 3:00 pm

Hey there!

I offer my websites penetration testing (hacking) services.

I've been in the field professionally for about 2 years now, working "freelance" for bug bounties. I've been able to successfully pen-test over 20 well-secured websites (including government & education systems), it is safe to say that's more than any other fellow pen-tester has managed to in my country. To serious clients I can provide proof and "portfolio" upon request.

If interested, please shoot me a PM to discuss the details, no payment required beforehand.

Trust seller and power fast service ! damn cool

throwsthrows666 - June 30, 2021, 8:18 am

Hello,

I have a question. How can we get in touch

Hellooo !!! ?

Do you use your own custom coded software for pentesting purposes or other 3rd party open source/ commercial software ? Do you have the license for the tools stored in your HDD currently ? I have a BIG project that I can glide to you (100k\$+) if you can publicly answer a couple of beginner questions in return of a token trustworthiness ?
