Thread: [FREE LEAKED 2ndHand EXPLOIT! Cheap DESIGNER, STREETWEAR, etc! Cheaper than thrifting!](#)

Max Payne - March 18, 2021, 4:38 pm

Made a MUCH easier to understand tutorial here:

https://docs.google.com/document/d/1zEYs7ADPETa1HAbzeojKLqF6r_WRyizowwzID0KGxPQ/

I paid for this exploit/method in a whitehat exploit discord server and figured I'd leak it here for free!

Poshmark is a site just like grailed, ebay, mercari, depop, etsy, etc. You can find high fashion on Poshmark for half the price or even less than on alternative secondhand sites/apps mostly because it seems to be boomer moms selling their kids shit and not knowing the value the items.???

The default and only shipping price for every item on the site is \$7.45. With this exploit you get \$10 off any purchase which means free shipping as well as \$2.55 off the price you pay. You can also make offers on listings and get designer clothing for literally cheaper than the shipping would cost if you find the right seller.

Turns out they have this free promotion code FREE10OFF whenever you sign up with a new account. The \$10 off only works with your first order, however you can maximize your gains from this by making alternative accounts by using Incognito mode with throwaway emails and paying with Google Pay every time.

IF you use any other payment option besides GPay they will detect that you're the same person making multiple accounts and won't allow that account to receive the \$10 off.

You can use the same exact shipping details with every alternative account that you make, you just need to make sure that you use Google Pay in order for this method to work. You also need to open a new incognito window each time you make a new order.

I have used this method to get ~\$3 carhartt beanies, ~\$10 nintendo switch games, ~\$15 legit supreme tees, ~\$10 Nike Air Force 1s in practically new condition, the list goes on. I've even purchased things on here for cheap then resold on Gr*iled and made some profit. Too lazy to walk a few miles to the post office or that'd be my hustle right now lol. Oh and by the way, if you receive designer that is apparently fake you can report it as being a replica, get your money back, and keep the replica without even having to ship it back.

Note these prices are AFTER shipping.

Max Payne

This method is practically unlimited so far and I've used it to buy at least a dozen things at this point. Btw you can put any email you want when creating new accounts, doesn't even have to be yours.

Or you can use the method of putting +1, +2, etc on your actual email and it still works. Example: hackforums@hackforums.com, hackforums+1@hackforums.com, hackforums+2@hackforums.com

The site would recognize these as three different emails and allow you to create new accounts with them.

When I received the method I was told that you're supposed to rate the seller after receiving your order because it apparently makes it less likely for your shipping info to get blacklisted.

Oh and THIS METHOD ONLY WORKS IN US, CANADA, AND AUSTRALIA!!!

Forgot to mention I even got a Nintendo Switch for far cheaper than market value using this method.

Also this is the first I've seen this method leaked to the public.

Just confirmed you can get BLACKLISTED if you do not mark your order as delivered after receiving your order. You don't actually need to rate the sellers, but you DO need to confirm that the order was received.
