Thread: [Terribly slow \[BRAND NAME REMOVED\] likes](#)

AZA-2000 - March 19, 2021, 11:41 am

Whenever I make a [BRAND NAME REMOVED] account nowadays the likes take FOREVER to hit 100... like 2-3 hours... it used to never be like this (i dont boost or anything just make a fresh acc and leave it) I remember a year ago it would hit 100 in the matter of 5 minutes. Is this normal now? or do i have like a halfway light shadowban.. I also use 911.re proxies if that has anything to do with it. I see people talking about 4g/lte proxies and wonder If I need to get one of those? If that's the cause of these slow likes what proxies do you recommend?

Yes mate its normal... If you use Boost it will make u shadow ban happen a couple of minute after the boost is done... Then completely banned after an hour... Its really sucks :D Im having an issue too.. No likes again

In the past I use 911 but now SOme people talking that its 911 is not working anymore... Illuminati is the best its too pricey... Smart proxy also a good choice

First of all, if you're getting likes you're not banned, your profile is probably shit.

Also 911's golden days are long gone.

911.re proxies have a 5/5 fraud score, it's definitely not worth it

Can anyone tell me what proxies to use? lol

i got expensive ass proxies from proxyguys and i still get slow likes.. made virtually 0 difference from using 911.re lol sticking to 911.re for now.. i guess slow likes is just the norm lately

It's doing fine but trust me , slow likes have nothing to do w proxies. Do more researches and spend some money testing different solutions.

Try 4G/LTE proxies but I doubt that's the reason why your likes are slow.

You're probably shadowbanned.

I think the issue is just [BRAND NAME REMOVED] itself.. lots of people getting slow likes lately. It's because [BRAND NAME REMOVED] isn't showing all your likes.. Ill only have 10 likes but ill be able to match 30+ people etc. [BRAND NAME REMOVED] is just bugged out
