Thread: [MULTI-CHASER => #1 Crypto Gambling Script <= NEVER SEEN STRATEGY*BUSTABIT*ETHCRASH+*](#)

Palms - March 20, 2021, 2:57 pm

The Multi-Chaser crypto gambling script!

This is a script for bustabit.com, ethercrash.io, nanogames.io, bc.games and bustadice currently. Ether dice soon to come.

It is coded to chase as many cash out numbers as you want, when it's the right time based on your settings.

This maximizes your ROI and you can play this script on almost ANY budget.

The script has no advanced logic behind it. It's based on the longest recorded streaks till now according to the 4.3 million games from Bustabit and the 3 million records of data that I pulled out from Ethercrash and Nanogames. We've seen over 10 million live games of data put together with all the records, to cover the longest losing streaks recorded till now!

Sample ROI's

-> 10 Percent Script:

- 20,00 bits returned 127k profit after 4 months! Over 600% ROI
- [Click here](#) for proof - (The results shown are for 30 days running the script, over 100k hashes tested)

-> Recommend Safety script:

- 20,000 bits return 43,000 bits after 4 months. Over 200% ROI
- [Click here](#) for proof (The results shown are for 30 days running the script, over 100k hashes tested)
- IG proof - [Click here](#)

How does it work?

The concept is pretty simple overall but to understand it is best to talk about chasing one number.

If you chase a 2x using normal martingale you need to double after each loss.

This you may try but you will eventually wipe since the amounts of the losing streaks and doubling you need to do, and that's basically for every multi.

The problem is that you don't have enough capital and if you had the capital your ROI would not be that great. Also works only with high bankrolls.

Solution: Introduce a concept of Activation.

What is Activation?

Activation is the idea of not to chase a cashout until a certain amount of games have occurred under the cashout you are chasing.

Example:

You want to start chasing 2x when 5 less than 2x multi games appear.

So when a 1.05x, 1.00x, 1.56x, 1.80x, 1.45x comes up, now you want to start betting for a 2x since 5 games without 2x came up in a row.

So how does the script know when to bet?

It is based on what we call "Survival Game # or "Survival Streak", which the script will deter for you automatically based on the capital you want to invest, the script will figure out when u have to start betting and it's all based on the Survival game # that you are able to handle with your BR

Survival game #

Each cash out on the script has a survival game setting. This can be changed by you but we also provide a bunch of default scripts with settings already made.

The script will take the capital you want to invest in the script and it will work backwards from the survival streak to figure out when it can activate.

The script will never go below a 2 activation point as its hardcoded not to go below that number.

So if you had 2000 bits as a balance and a survival game of 22 for 2x (Means you can survive a streak of 22 games in a streak less than 2x) the activation number would be 12.

(1,2,4,8,16,32,64,128,256,512 bits) and will start chasing only when 12 games without 2x appears. That way you are able to resist every kind of losing streak ever recorded till now! (Interesting fact is that the streak record of 20 games hasn't been broken for over 3 years)

Cashouts:

Now 2x longest streak is 20 on Bustabit. So 22 is a pretty safe number so far as we have never seen it in the 4.2 million Bustabit games so far. By using this logic we can't make a lot of money because 12 games less than 2x don't come up that often & waiting for this to activate will be painful but wait a second, if we apply this to many cash outs if a 2x hasn't activated maybe a 4x has? Or 12x? Or 20x? Or 1000x, we can do that - and that is the Multi Chaser!

It's monitoring every single cashout, keeping a counter on every single one in memory there, waiting for the activation to start betting!

Welcome to the Multi chaser!

The script chases 1.5x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 11x, 12x, 14x, 16x, 20x, 26x, 30x, 40x, 50x, 60x, 70x, 80x, 90x, 100x, 200x, 500x, 1000x and 2000x.

We can add many more numbers very easily. By doing this our ROI goes up significantly as well with the risk.

The scripts provided by default cover the longest longest ever recorded losing streaks till now and has his own "safety". The more safety, the less ROI.

Bonus Feature: Re-Invest after nyan, Console log tracking, Sound on winning & Discord bot

There's ability for discord integration, so you can keep an eye and get notified on when the bot is betting along with all the infos from the console log.

[Click here](#) to check out the console log infos.

Upon purchasing the script you will receive:

All my excel tabs with the data pulled out from BaB and the rest sites.

Both versions of the script (Safe/Aggressive)

The script working for all the sites mentioned above.

Lifetime support & updates

Prices:
\$29,99 USD

[contract=tid]Start Contract[/contract]

We accept: BTC, ETH, LTC, DOGE, EOS, TRX, BCH, XRP

Whoever is interested feel free to PM me on here or post your question below.

I'll be always happy to test out the script on your own hashes or do a live preview of how the script works!

Palms - April 15, 2021, 11:17 am

UP!

Now added a few more multis to chase on like 15x, increased the monthly ROI to 300% from the previous 200% for the Safety script.

maki000124k - April 20, 2021, 4:42 pm

I'm quite interested. However, does the bc.game script include limbo game functionality, or just for crash? Also, do all the features work for bustadice?

maki000124k - April 21, 2021, 9:01 pm

I'm interested. Would like to receive more details.

Cryptoken - April 22, 2021, 3:23 pm

Martingale strategy is not for the weak minds. I'd be careful.

Palms - April 22, 2021, 4:45 pm

(Apr 22, 2021 03:23 PM)Cryptoken Wrote: [\[CITE\]](#) Martingale strategy is not for the weak minds. I'd be careful.

It's not a martingale strategy?

Cryptoken - April 22, 2021, 7:43 pm

It does not factor market condition, I can see from the analysis above that the trades are placed in grids, and size is increased to cover losses if the market goes the opposite way. gridding, averaging, and martingale will burn account one day is a super volatile environment of market flash.

Palms - April 23, 2021, 3:21 am

When the Martingale Strategy is used in betting, the gambler must double the bet when faced with a loss and my script is not based on that logic obviously. It's based on already known and provable statistics called losing streaks for each multiplier.

The script will work back through your balance & it will configure your base bet and "activation" numbers so you can resist the longest recorded losing streaks for each multi with your bankroll... Furthermore, I've introduced the function of "safety" which will cover the next most probable losing streak according to the previous statistics.

Here's a detailed video presentation of the script since I feel i didnt explain it well enough in my thread!

Zlatane Ibrahimovique - April 26, 2021, 8:58 am

Information 5/5

The information provided in the Palms' product was LARGELY beyond my expectations. I have had experience with other BustaBit products (buying/creating scripts), and I can say this is the most complete product I have tried - by far. The amount and detail of provided information is insane and helps you to understand each strategy in full.

Content explanation 4/5

The product has innumerable resources that focus explicitly on explaining the setup process, how to use it in multiple platforms, the strategies and the possible earnings and inherent risk of each one.

There is some "technical" explanation that basically refers to the factors of the formula, that if you try to skip, you might eventually not understand how to setup the script (like I did - don't skip the learning materials!).

Resources 5/5

The amount of scripts for different platforms, multiple strategies, the calculations for each strategy, and even a video explanation of how it all works in detail provides a personal and nice touch that I haven't seen in any kind of other product in the market.

Support 5/5

This is one of the areas that the OP made an awesome difference. From the moment I received the product to the moment I made the review, the OP was very promptly and replied to every single question.

I have suggested him to eventually add a Discord/Telegram to the thread as it usually helps to build confidence, but I didn't had the need for it. Awesome OP, well done!

Summary

This product contains a number of very UNIQUE strategies in the market - that work! After trying several other scripts and building my own, the amount of confidence and safety these strategies provide is from another world.

I think there are minor areas of the product that could be improved, but in the grand scheme of things, they should not deter a purchase at all.

Considering the low price, you really do get solid value for your investment and you should be able to recover it very safely and start making profit almost instantly.

The resources have a LOT of awesome information. I have suggested as well to OP to condense a

bit more information in a small guide, just for the sake of people who don't want to read every detail.

OP, thank you for the vouch copy. I think you are selling a legitimate and unique(!) product, and wish you the best luck with sales. If you ever need vouches, feel free to contact me. While I try not to offend sellers in my review, I remain unbiased and honest with your potential clients to (hopefully) encourage sales. I hope that you can appreciate that, and take no offense to any negatives I've listed.

Thank you for the honest and detailed review!

Im not giving away more vouch copies!

Whoever is interested to learn more about the script - feel free to pm me on here!

Palms - May 11, 2021, 9:13 am

Up~

Releasing the version 1.1 of the Multichaser script!
-added Ether-dice version and a few more cool features.

I am not able to edit my thread so i cant update the newest features so whoever is interested just pm me..

SIM-4530291 - June 7, 2021, 6:02 pm

Is your dice script still for sale? What starting bankroll do you recommend?

Shamrocks26 - August 25, 2021, 8:32 pm

Is this available still? Let me know!

Do you have proof of earnings for this method?

DogeBoyFresh - October 4, 2021, 5:37 am

Is this a lua script? Or a dice bot?

XRated - October 4, 2021, 7:47 am

Interested in purchasing this for bustabit

Palms - October 4, 2021, 12:51 pm

(Oct 4, 2021 05:37 AM)DogeBoyFresh Wrote: [\[CITE\]](#) Is this a lua script? Or a dice bot?No it's not lua script or a dice bot. I think I've briefly explained how the script works and it has nothing to do with these two u mentioned above.

(Oct 4, 2021 07:47 AM)instaFlips Wrote: [\[CITE\]](#) Interested in purchasing this for bustabit
Feel free to open a contract or pm me if u got more questions :)

Comzey - October 18, 2021, 7:45 am

Is this still working consistently?

fknhippie - December 8, 2021, 1:06 pm

How do you determine the calculation for different payouts?

JuiceBoxCereal - December 10, 2021, 10:14 am

What's your Bustabit username to verify earnings?

Palms - February 18, 2022, 10:54 am

Up~

After a few months of inactivity, releasing a new update ONLY for the Bustabit version - Introducing the "Median" option. (Coded to collect the previous "x" games to deter the median totals number. The script wont bet until the desired median number met - extremely useful for whales - Slower profits but safer!)

Whoever purchased the first version of the script, feel free to text me so i can provide u with the upgraded version.

Palms - March 2, 2022, 11:37 am

Quick update:

- Added the "Median" option to the script converted for every platform mentioned in the thread.

I am also willing to giveaway 3 vouch copies to reputable members vs a honest and complete review of my product to prove its quality and the fact that's its the only and proly the most legit script for crypto crash games out there!~

bader6100 - March 2, 2022, 12:03 pm
