Browser Stealer(passwords , cookies , autofil info,pc info ,screenshot).

Enter your gmail email and password,choose an icon,test your gmail for receiving app emails
click build to create the .exe file,
run the .exe file you created on any computer.
after few seconds you get an email containing:-

- stored browser (passwords) ,
- stored browser (cookies cookies) is in decrypted format you can import it in your browser and steal session
- AutoFill data ie...stored(phone_numbers,stored emails , ID,personal names ,addresses)
- pc informations like (IP Geolocation ,BSSID,RAM,GPU,Operating system..etc)
- All running processes,installed antivirus
- screen capture

-you can arrange all stolen browser data ie.. put every browser cookies in one text file using cookies arranger tool

Features: supported more than 60 browsers

Works on Windows 10 , 8 , 7 using test gmail button, you can send test email , to avoid receiving emails problems

Small server size(60kb)

*icon changer

*Bypasses Windows Defender

*its stub is connected to http server and you can easily update it

*easy to be encrypted using any simple cryption method or any any crypter (.net or native)

how to encrypt it?

its payload can be fud using any simple cryption method or any any crypter (.net or native)

if you want free trial to this tool

Couple things, wrong section ,

2 .

is it a http builder or EXE builder that has a http panel. Im little confused, also have anyone checked to make sure that there is no backdoor lol.

Can you post some scans of the file?

Can you show some screenshots of the program?

amalgaithxx66 - March 24, 2021, 6:20 am

hello xZalurex ,its exe builder
if you want more details just PM
